

IT ASSET MANAGEMENT SYSTEM

TEST CASES

LOGIN MODULE

1 Login Module – Positive Test Cases

Positive test cases verify that valid credentials and valid inputs are accepted by the application.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
LOGIN-P01	Valid HR login using ID	260822001 + Valid HR Password	HR should be logged in successfully	HR logged in successfully	PASS
LOGIN-P02	Valid Asset Manager login using ID	260822002 + Valid Asset Manager Password	Asset Manager should be logged in successfully	Asset Manager logged in successfully	PASS
LOGIN-P03	Valid Inventory Manager login using ID	260822003 + Valid Inventory Password	Inventory Manager should be logged in successfully	Inventory Manager logged in successfully	PASS
LOGIN-P04	Valid HR login using email	260822001a@gmail.com + Valid HR Password	HR should be logged in successfully	HR logged in successfully	PASS
LOGIN-P05	Valid Asset Manager login using email	260822002a@gmail.com + Valid Asset Manager Password	Asset Manager should be logged in successfully	Asset Manager logged in successfully	PASS
LOGIN-P06	Valid Inventory Manager login using email	260822003a@gmail.com + Valid Inventory Password	Inventory Manager should be logged in successfully	Inventory Manager logged in successfully	PASS
LOGIN-P07	Login using valid HR credentials	Correct HR ID + corresponding password	HR dashboard/home page should open	HR dashboard/home page opened	PASS
LOGIN-P08	Login using valid Asset Manager credentials	Correct Asset Manager ID + corresponding password	Asset Manager dashboard should open	Asset Manager dashboard opened	PASS
LOGIN-P09	Login using valid Inventory Manager credentials	Correct Inventory ID + corresponding password	Inventory page/dashboard should open	Inventory page/dashboard opened	PASS
LOGIN-P10	Password visibility	Valid password + click eye icon	Password should become visible	Password became visible	PASS
LOGIN-P11	Hide password	Visible password + click eye icon	Password should become hidden	Password became hidden	PASS
LOGIN-P12	Logout after successful login	Valid login followed by Logout	User should be logged out	User logged out successfully	PASS

2 Login Module – Negative Test Cases

Negative test cases verify that invalid, incomplete, or unauthorized inputs are rejected by the application.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
LOGIN-N01	HR ID with Asset Manager password	260822001 + Asset Manager Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N02	HR ID with Inventory Manager password	260822001 + Inventory Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N03	Asset Manager ID with HR password	260822002 + HR Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N04	Asset Manager ID with Inventory password	260822002 + Inventory Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N05	Inventory ID with HR password	260822003 + HR Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N06	Inventory ID with Asset Manager password	260822003 + Asset Manager Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N07	Invalid ID with valid HR password	260822999 + HR Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N08	Invalid ID with valid Asset Manager password	260822999 + Asset Manager Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N09	Invalid ID with valid Inventory password	260822999 + Inventory Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N10	Valid HR ID with wrong password	260822001 + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N11	Valid Asset Manager ID with wrong password	260822002 + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N12	Valid Inventory ID with wrong password	260822003 + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N13	Invalid ID and invalid password	123456789 + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N14	Only HR ID entered	260822001 + Empty Password	Password validation should appear	Password validation displayed; login not allowed	PASS
LOGIN-N15	Only Asset Manager ID entered	260822002 + Empty Password	Password validation should appear	Password validation displayed; login not allowed	PASS
LOGIN-N16	Only Inventory ID entered	260822003 + Empty Password	Password validation should appear	Password validation displayed; login not allowed	PASS

LOGIN-N17	Only password entered	Empty ID + HR Password	ID/email validation should appear	ID/email validation displayed; login not allowed	PASS
LOGIN-N18	Both ID and password empty	Empty + Empty	Required-field validation should appear	Required-field validation displayed	PASS
LOGIN-N19	Invalid ID containing letters	26082200A + Password	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N20	ID with fewer digits	26082200 + Password	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N21	ID with more digits	2608220011 + Password	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N22	ID containing spaces	260822 001 + Password	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N23	ID with leading space	Space + 260822001	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N24	ID with trailing space	260822001 + Space	Login should be rejected	Invalid ID validation displayed	PASS
LOGIN-N25	Non-existing email	260822999a@gmail.com + Password	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N26	Invalid email format	260822001agmail.com + Password	Login should be rejected	Invalid email validation displayed	PASS
LOGIN-N27	Email without domain	260822001a@ + Password	Login should be rejected	Invalid email validation displayed	PASS
LOGIN-N28	Email without @ symbol	260822001agmail.com + Password	Login should be rejected	Invalid email validation displayed	PASS
LOGIN-N29	Email containing spaces	260822001a@gmail.com + Password	Login should be rejected	Invalid email validation displayed	PASS
LOGIN-N30	Valid HR email with wrong password	260822001a@gmail.com + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N31	Valid Asset Manager email with wrong password	260822002a@gmail.com + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N32	Valid Inventory email with wrong password	260822003a@gmail.com + Wrong@123	Login should be rejected	Login rejected and invalid credentials displayed	PASS
LOGIN-N33	Valid HR ID with empty password	260822001 + Empty	Login should not proceed	Password validation displayed	PASS
LOGIN-N34	Empty ID with valid HR password	Empty + HR Password	Login should not proceed	ID/email validation displayed	PASS
LOGIN-N35	Random ID and random password	111111111 + Abc@1234	Login should be rejected	Login rejected	PASS

3 Login Module – Password Validation Test Cases

ID	Test Case	Test Data	Expected Result	Actual Result	Status
LOGIN-N36	Password less than 8 characters	Ab@123	Password should be rejected	Password validation displayed	PASS
LOGIN-N37	Password without uppercase	itams@2026h	Password should be rejected	Password validation displayed	PASS
LOGIN-N38	Password without lowercase	ITAMS@2026H	Password should be rejected	Password validation displayed	PASS
LOGIN-N39	Password without number	Itams@abcdef	Password should be rejected	Password validation displayed	PASS
LOGIN-N40	Password without special character	Itams2026h	Password should be rejected	Password validation displayed	PASS
LOGIN-N41	Password containing spaces	Itams @2026h	Password should be rejected	Password validation displayed	PASS
LOGIN-N42	Empty password	Empty	Password-required validation should appear	Password-required validation displayed	PASS

4 Login Module – Cross-Role Credential Testing

ID	Credential Combination	Expected Result	Actual Result	Status
LOGIN-S01	HR ID + HR Password	Login allowed	HR logged in successfully	PASS
LOGIN-S02	Asset Manager ID + Asset Manager Password	Login allowed	Asset Manager logged in successfully	PASS
LOGIN-S03	Inventory ID + Inventory Password	Login allowed	Inventory Manager logged in successfully	PASS
LOGIN-S04	HR ID + Asset Manager Password	Login rejected	Login rejected	PASS
LOGIN-S05	HR ID + Inventory Password	Login rejected	Login rejected	PASS
LOGIN-S06	Asset Manager ID + HR Password	Login rejected	Login rejected	PASS
LOGIN-S07	Asset Manager ID + Inventory Password	Login rejected	Login rejected	PASS
LOGIN-S08	Inventory ID + HR Password	Login rejected	Login rejected	PASS
LOGIN-S09	Inventory ID + Asset Manager Password	Login rejected	Login rejected	PASS
LOGIN-S10	Random ID + Random Password	Login rejected	Login rejected	PASS

5 Forgot Password Module – Positive Test Cases

Positive test cases verify that registered email IDs, valid OTPs, and valid new passwords are accepted by the application.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
FP-P01	Forgot password for HR account	260822001a@gmail.com	Registered email should be accepted	Registered HR email accepted	PASS
FP-P02	Forgot password for Asset Manager account	260822002a@gmail.com	Registered email should be accepted	Registered Asset Manager email accepted	PASS
FP-P03	Forgot password for Inventory Manager account	260822003a@gmail.com	Registered email should be accepted	Registered Inventory Manager email accepted	PASS
FP-P04	Send OTP for HR account	260822001a@gmail.com	OTP should be sent to registered email	OTP sent to registered HR email	PASS
FP-P05	Send OTP for Asset Manager account	260822002a@gmail.com	OTP should be sent to registered email	OTP sent to registered Asset Manager email	PASS
FP-P06	Send OTP for Inventory Manager account	260822003a@gmail.com	OTP should be sent to registered email	OTP sent to registered Inventory Manager email	PASS
FP-P07	Verify correct HR OTP	Registered HR email + correct 6-digit OTP	OTP should be verified successfully	HR OTP verified successfully	PASS
FP-P08	Verify correct Asset Manager OTP	Registered Asset Manager email + correct 6-digit OTP	OTP should be verified successfully	Asset Manager OTP verified successfully	PASS
FP-P09	Verify correct Inventory Manager OTP	Registered Inventory Manager email + correct 6-digit OTP	OTP should be verified successfully	Inventory Manager OTP verified successfully	PASS
FP-P10	Enter valid new password	Valid password	New password should be accepted	New password accepted	PASS
FP-P11	Confirm matching new password	Same new password in both fields	Passwords should match	Passwords matched successfully	PASS
FP-P12	Reset HR password	HR email + correct OTP + valid new password	HR password should be reset successfully	HR password reset successfully	PASS
FP-P13	Reset Asset Manager password	Asset Manager email + correct OTP + valid new password	Asset Manager password should be reset successfully	Asset Manager password reset successfully	PASS
FP-P14	Reset Inventory Manager password	Inventory Manager email + correct OTP + valid new password	Inventory Manager password should be reset successfully	Inventory Manager password reset successfully	PASS
FP-P15	Login using newly reset password	Reset account + new password	User should be able to login	User logged in successfully with new password	PASS

6 Forgot Password Module – Negative Test Cases

Negative test cases verify that invalid email IDs, incorrect OTPs, incomplete inputs, and invalid passwords are rejected.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
FP-N01	Submit empty email	Empty	Email validation should appear	Email validation displayed	PASS
FP-N02	Enter unregistered email	260822999a@gmail.com	Email should be rejected	Unregistered email rejected	PASS
FP-N03	Enter email without @ symbol	260822001agmail.com	Invalid email validation should appear	Invalid email validation displayed	PASS
FP-N04	Enter email without domain	260822001a@	Invalid email validation should appear	Invalid email validation displayed	PASS
FP-N05	Enter email without required format	260822001@gmail.com	Email should be rejected	Invalid email validation displayed	PASS
FP-N06	Enter normal Gmail address	test@gmail.com	Email should be rejected	Invalid email validation displayed	PASS
FP-N07	Enter email containing spaces	260822001a@gmail.com	Email should be rejected	Invalid email validation displayed	PASS
FP-N08	Enter invalid characters in email	260822001#a@gmail.com	Email should be rejected	Invalid email validation displayed	PASS
FP-N09	Enter invalid employee ID in email	260822999a@gmail.com	Email should not be accepted as registered account	Unregistered account rejected	PASS
FP-N10	Submit email with excessive length	Email exceeding allowed length	Email should be rejected	Email length validation displayed	PASS
FP-N11	Submit empty OTP	Empty	OTP validation should appear	OTP validation displayed	PASS
FP-N12	Enter OTP with fewer than 6 digits	12345	OTP should be rejected	Invalid OTP validation displayed	PASS
FP-N13	Enter OTP with more than 6 digits	1234567	OTP should be rejected	Invalid OTP validation displayed	PASS
FP-N14	Enter OTP containing letters	12AB56	OTP should be rejected	Invalid OTP validation displayed	PASS
FP-N15	Enter OTP containing special characters	12@456	OTP should be rejected	Invalid OTP validation displayed	PASS
FP-N16	Enter OTP containing spaces	123 456	OTP should be rejected	Invalid OTP validation displayed	PASS
FP-N17	Enter incorrect 6-digit OTP	Incorrect 6-digit OTP	OTP should be rejected	Invalid OTP message displayed	PASS
FP-N18	Enter expired OTP	Expired OTP	OTP should be rejected	Expired or invalid OTP message displayed	PASS
FP-N19	Verify OTP without entering email	Empty email + OTP	Email validation should appear	Email validation displayed	PASS
FP-N20	Verify OTP without entering OTP	Registered email + Empty OTP	OTP validation should appear	OTP validation displayed	PASS
FP-N21	Reset password without OTP verification	Registered email + Unverified OTP + Password	Password reset should not proceed	Password reset rejected because OTP was not verified	PASS

7 Forgot Password Module – New Password Validation

ID	Test Case	Test Data	Expected Result	Actual Result	Status
FP-P16	Enter valid new password	Valid password meeting password rules	Password should be accepted	Password accepted	PASS
FP-P17	Confirm matching password	Same password in both fields	Passwords should match	Passwords matched	PASS
FP-P18	Show new password	Click password visibility icon	Password should become visible	Password became visible	PASS
FP-P19	Hide new password	Click password visibility icon again	Password should become hidden	Password became hidden	PASS
FP-N22	Enter empty new password	Empty	Password-required validation should appear	Password validation displayed	PASS
FP-N23	Enter password shorter than required length	Ab@123	Password should be rejected	Password length validation displayed	PASS
FP-N24	Enter password without uppercase	itams@2026	Password should be rejected	Uppercase validation displayed	PASS
FP-N25	Enter password without lowercase	ITAMS@2026	Password should be rejected	Lowercase validation displayed	PASS
FP-N26	Enter password without number	Itams@abcdef	Password should be rejected	Number validation displayed	PASS
FP-N27	Enter password without special character	Itams2026	Password should be rejected	Special character validation displayed	PASS
FP-N28	Enter password containing spaces	Itams @2026	Password should be rejected	Space validation displayed	PASS
FP-N29	Leave confirm password empty	Valid password + Empty confirmation	Confirmation validation should appear	Confirmation validation displayed	PASS
FP-N30	Enter mismatched passwords	Itams@2026A / Itams@2026B	Password reset should not proceed	Password mismatch message displayed	PASS
FP-N31	Enter password exceeding maximum length	Password exceeding allowed length	Password should be rejected	Password length validation displayed	PASS

8 Forgot Password Module – End-to-End Test Cases

ID	Test Case	Expected Result	Actual Result	Status
FP-E2E01	HR email → Send OTP → Correct OTP → New Password → Confirm Password → Reset	HR password should be reset successfully	HR password reset successfully	PASS
FP-E2E02	Asset Manager email → Send OTP → Correct OTP → New Password → Confirm Password → Reset	Asset Manager password should be reset successfully	Asset Manager password reset successfully	PASS
FP-E2E03	Inventory Manager email → Send OTP → Correct OTP → New Password → Confirm Password → Reset	Inventory Manager password should be reset successfully	Inventory Manager password reset successfully	PASS
FP-E2E04	Registered email → Wrong OTP → Reset Password	Password reset should not proceed	Password reset rejected due to invalid OTP	PASS
FP-E2E05	Registered email → Correct OTP → Mismatched Passwords	Password reset should not proceed	Password reset rejected due to password mismatch	PASS
FP-E2E06	Registered email → Correct OTP → Valid New Password → Login	User should login using new password	User logged in successfully using new password	PASS
FP-E2E07	Unregistered email → Send OTP	OTP should not be generated for unregistered account	OTP request rejected	PASS
FP-E2E08	Registered email → Expired OTP → Reset Password	Password reset should not proceed	Password reset rejected due to expired OTP	PASS

9 HR Module – Positive Test Cases

Positive test cases verify that an authorized HR user can successfully access and use the HR page.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
HR-P01	Login as HR	HR ID + correct HR password	HR page/dashboard should open	HR page/dashboard opened successfully	PASS
HR-P02	Verify HR page loads completely	Open HR page	All visible HR page components should load correctly	HR page components loaded correctly	PASS
HR-P03	Verify HR page title/header	Open HR page	Correct HR page title/header should be displayed	Correct HR title/header displayed	PASS
HR-P04	Verify navigation menu	Click each available navigation item	Corresponding page/module should open	Corresponding page opened	PASS
HR-P05	Verify dashboard/home navigation	Click Home/Dashboard	HR dashboard should be displayed	HR dashboard displayed	PASS
HR-P06	Verify logout	Click Logout	User should be logged out and redirected to Login	User logged out successfully	PASS
HR-P07	Login again after logout	HR credentials	HR page should open again	HR page opened successfully	PASS

HR-P08	Browser refresh on HR page	Refresh page after login	HR page should remain accessible if session is valid	HR page remained accessible	PASS
--------	----------------------------	--------------------------	--	-----------------------------	-------------

10 HR Module – Negative / Security Test Cases

Negative and security test cases verify that unauthorized users and users without valid sessions cannot access protected HR functionality.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
HR-N01	Access HR page without login	Open HR page without login	Access should be denied or user redirected to Login	User redirected to Login	PASS
HR-N02	Access HR page after logout	Logout → Open HR page	User should not access HR page	Access denied / redirected to Login	PASS
HR-N03	Access HR page with invalid session	Invalid or expired session	User should not access protected HR page	Access denied	PASS
HR-N04	Asset Manager attempts HR-only access	Login as Asset Manager → HR-only page	Unauthorized access should be denied	Access denied	PASS
HR-N05	Inventory Manager attempts HR-only access	Login as Inventory Manager → HR-only page	Unauthorized access should be denied	Access denied	PASS
HR-N06	Direct URL access without authorization	Open protected HR URL directly	Unauthorized user should not access the page	Access denied / redirected	PASS
HR-N07	Browser Back after logout	Logout → Browser Back	Previous protected HR page should not become usable	Protected page remained inaccessible	PASS
HR-N08	Invalid HR route	Open invalid HR URL	Application should handle invalid route correctly	Invalid route handled correctly	PASS

11 Add Employee Module – Positive Test Cases

Positive test cases verify that valid employee details are accepted and a new employee can be created successfully.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
EMP-P01	Open Add Employee page	Click Add Employee	Add Employee form should open	Add Employee form opened successfully	PASS
EMP-P02	Enter valid employee ID	Valid employee ID	Employee ID should be accepted	Employee ID accepted	PASS
EMP-P03	Enter valid employee name	Rahul Kumar	Employee name should be accepted	Employee name accepted	PASS
EMP-P04	Enter valid phone number	+919876543210	Phone number should be accepted	Phone number accepted	PASS
EMP-P05	Phone number starting with 6	+916987654321	Phone number should be accepted	Phone number accepted	PASS
EMP-P06	Phone number starting with 7	+917987654321	Phone number should be accepted	Phone number accepted	PASS
EMP-P07	Phone number starting with 8	+918987654321	Phone number should be accepted	Phone number accepted	PASS

EMP-P08	Phone number starting with 9	+919876543210	Phone number should be accepted	Phone number accepted	PASS
EMP-P09	Enter valid designation	Software Engineer	Designation should be accepted	Designation accepted	PASS
EMP-P10	Designation with multiple words	Senior Software Engineer	Designation should be accepted	Designation accepted	PASS
EMP-P11	Enter valid date of joining	Date within past 7 days up to today	Date of joining should be accepted	Date of joining accepted	PASS
EMP-P12	Valid employee ID and joining date	Valid Employee ID + Valid Date of Joining	Employee ID and joining date should be accepted	Employee ID and joining date accepted	PASS
EMP-P13	Enter all valid employee details	All mandatory fields with valid values	Employee should be created successfully	Employee created successfully	PASS

12 Add Employee Module – Negative Test Cases

Negative test cases verify that invalid employee details are rejected and an employee is not created when validation rules are violated.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
EMP-N01	Submit empty Add Employee form	All fields empty	Required-field validation should appear	Required-field validation displayed	PASS
EMP-N02	Enter empty employee ID	Employee ID empty	Employee ID validation should appear	Employee ID validation displayed	PASS
EMP-N03	Enter invalid employee ID	Invalid employee ID	Employee ID should be rejected	Invalid employee ID validation displayed	PASS
EMP-N04	Enter empty employee name	Name empty	Employee name validation should appear	Employee name validation displayed	PASS
EMP-N05	Enter employee name with numbers	Rahul123	Employee name should be rejected	Name validation displayed	PASS
EMP-N06	Enter employee name with special characters	Rahul@Kumar	Employee name should be rejected	Name validation displayed	PASS
EMP-N07	Enter empty phone number	Phone empty	Phone validation should appear	Phone validation displayed	PASS
EMP-N08	Phone number without +91	9876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N09	Phone number starting with 5	+915876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N10	Phone number starting with 4	+914876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N11	Phone number starting with 3	+913876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N12	Phone number starting with 2	+912876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N13	Phone number starting with 1	+911876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N14	Phone number containing letters	+91987654ABCD	Phone number should be rejected	Phone validation displayed	PASS
EMP-N15	Phone number containing spaces	+91 9876543210	Phone number should be rejected	Phone validation displayed	PASS

EMP-N16	Phone number containing hyphen	+91-9876543210	Phone number should be rejected	Phone validation displayed	PASS
EMP-N17	Phone number with fewer digits	+91987654321	Phone number should be rejected	Phone validation displayed	PASS
EMP-N18	Phone number with more digits	+9198765432101	Phone number should be rejected	Phone validation displayed	PASS
EMP-N19	Enter empty designation	Designation empty	Designation validation should appear	Designation validation displayed	PASS
EMP-N20	Designation containing numbers	Engineer123	Designation should be rejected	Designation validation displayed	PASS
EMP-N21	Designation containing special characters	Engineer@IT	Designation should be rejected	Designation validation displayed	PASS
EMP-N22	Designation containing special symbol	Engineer#	Designation should be rejected	Designation validation displayed	PASS
EMP-N23	Designation containing only numbers	12345	Designation should be rejected	Designation validation displayed	PASS
EMP-N24	Enter empty date of joining	Date of joining empty	Date validation should appear	Date validation displayed	PASS
EMP-N25	Date of joining older than 7 days	Date more than 7 days before today	Date should be rejected	Date validation displayed	PASS
EMP-N26	Future date of joining	Tomorrow's date	Date should be rejected	Date validation displayed	PASS
EMP-N27	Invalid date of joining	Invalid date	Date should be rejected	Date validation displayed	PASS
EMP-N28	Employee ID and joining date relationship invalid	Invalid Employee ID + Date of Joining	Employee details should be rejected	Validation displayed	PASS
EMP-N29	Submit with invalid phone number	Invalid phone + remaining valid fields	Employee should not be created	Employee not created	PASS
EMP-N30	Submit with invalid designation	Invalid designation + remaining valid fields	Employee should not be created	Employee not created	PASS
EMP-N31	Submit with invalid joining date	Invalid joining date + remaining valid fields	Employee should not be created	Employee not created	PASS
EMP-N32	Submit with missing mandatory field	One required field empty	Employee should not be created	Employee not created and validation displayed	PASS
EMP-N33	Duplicate employee details	Existing employee details	Duplicate employee should not be created	Duplicate employee rejected	PASS
EMP-N34	Cancel Add Employee operation	Enter employee details → Click Cancel	Form should close without creating employee	Form closed without creating employee	PASS

13 Add Employee Module – Date and Employee ID Validation

The Date of Joining validation verifies that the joining date falls within the allowed period. The Employee ID and Date of Joining relationship is also verified.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
EMP-D01	Joining date is today	Today's date	Date should be accepted	Date accepted	PASS
EMP-D02	Joining date is 1 day before today	Yesterday's date	Date should be accepted	Date accepted	PASS
EMP-D03	Joining date is 3 days before today	Date 3 days before today	Date should be accepted	Date accepted	PASS
EMP-D04	Joining date is 7 days before today	Date 7 days before today	Date should be accepted if boundary is inclusive	Date accepted	PASS
EMP-D05	Joining date is more than 7 days before today	Date 8 or more days before today	Date should be rejected	Date validation displayed	PASS
EMP-D06	Joining date is tomorrow	Tomorrow's date	Future joining date should be rejected	Date validation displayed	PASS
EMP-D07	Employee ID and Date of Joining are valid	Valid Employee ID + valid joining date	Details should be accepted	Details accepted	PASS
EMP-D08	Employee ID does not satisfy joining-date rule	Invalid Employee ID + joining date	Details should be rejected	Validation displayed	PASS

14 Add Employee Module – Phone Number Validation

The phone number must use the required Indian country code format and the mobile number must begin with 6, 7, 8, or 9.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
EMP-P14	Valid phone starting with 6	+916987654321	Phone should be accepted	Phone accepted	PASS
EMP-P15	Valid phone starting with 7	+917987654321	Phone should be accepted	Phone accepted	PASS
EMP-P16	Valid phone starting with 8	+918987654321	Phone should be accepted	Phone accepted	PASS
EMP-P17	Valid phone starting with 9	+919876543210	Phone should be accepted	Phone accepted	PASS
EMP-N35	Phone without +91	9876543210	Phone should be rejected	Phone validation displayed	PASS
EMP-N36	Phone starts with 5	+915876543210	Phone should be rejected	Phone validation displayed	PASS
EMP-N37	Phone starts with 4	+914876543210	Phone should be rejected	Phone validation displayed	PASS
EMP-N38	Phone starts with 0	+910876543210	Phone should be rejected	Phone validation displayed	PASS
EMP-N39	Phone contains alphabetic characters	+91987654ABCD	Phone should be rejected	Phone validation displayed	PASS

EMP-N40	Phone contains spaces	+91 9876543210	Phone should be rejected	Phone validation displayed	PASS
---------	-----------------------	----------------	--------------------------	----------------------------	------

15 Add Employee Module – Designation Validation

The designation field is tested to ensure that invalid numeric and special-character inputs are rejected.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
EMP-D09	Valid designation with one word	Engineer	Designation should be accepted	Designation accepted	PASS
EMP-D10	Valid designation with multiple words	Software Engineer	Designation should be accepted	Designation accepted	PASS
EMP-D11	Valid designation with multiple words	Senior Software Engineer	Designation should be accepted	Designation accepted	PASS
EMP-D12	Designation containing numbers	Engineer123	Designation should be rejected	Designation validation displayed	PASS
EMP-D13	Designation containing special characters	Engineer@IT	Designation should be rejected	Designation validation displayed	PASS
EMP-D14	Designation containing symbols	Engineer#	Designation should be rejected	Designation validation displayed	PASS
EMP-D15	Designation containing only numbers	12345	Designation should be rejected	Designation validation displayed	PASS
EMP-D16	Empty designation	Empty	Designation validation should appear	Designation validation displayed	PASS

16 Update Employee Module – Positive Test Cases

Positive test cases verify that an existing employee can be searched and updated successfully using valid employee details.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
UPD-P01	Open Update Employee page	Navigate to Update Employee	Update Employee page should open	Update Employee page opened successfully	PASS
UPD-P02	Search employee using valid Employee ID	260822004	Employee details should be displayed	Employee details displayed successfully	PASS
UPD-P03	Verify Employee ID is read-only	Try to edit Employee ID	Employee ID should not be editable	Employee ID remained read-only	PASS
UPD-P04	Update employee name with valid value	V Shivan	Employee name should be accepted	Employee name accepted	PASS
UPD-P05	Update department	Select Marketing	Selected department should be accepted	Marketing selected successfully	PASS
UPD-P06	Update designation	Select Executive	Selected designation should be accepted	Executive selected successfully	PASS
UPD-P07	Update phone number with valid value	9676593722	Phone number should be accepted	Phone number accepted successfully	PASS

UPD-P08	Update multiple employee details	Valid name + department + designation + phone	All modified details should be accepted	All modified details accepted	PASS
UPD-P09	Click Update Details with valid data	All editable fields contain valid values	Employee details should be updated successfully	Employee details updated successfully	PASS
UPD-P10	Verify updated employee details	Search 260822004 again	Updated details should be displayed	Updated details displayed correctly	PASS
UPD-P11	Cancel update operation	Modify details → Click Cancel	Changes should be cancelled	Changes cancelled successfully	PASS
UPD-P12	Search another valid employee	Another valid Employee ID	Corresponding employee details should be displayed	Correct employee details displayed	PASS

17 Update Employee Module – Search Negative Test Cases

Negative test cases verify that invalid or non-existing Employee IDs cannot be used to retrieve employee details.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
UPD-N01	Search with empty Employee ID	Empty	Employee ID validation should appear	Employee ID validation displayed	PASS
UPD-N02	Search with fewer digits	26082200	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
UPD-N03	Search with more digits	2608220041	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
UPD-N04	Search Employee ID containing letters	26082200A	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
UPD-N05	Search Employee ID containing spaces	260822 004	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
UPD-N06	Search Employee ID containing special characters	260822@004	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
UPD-N07	Search non-existing Employee ID	260899999	Employee should not be found	Employee not found message displayed	PASS
UPD-N08	Search valid-format but unavailable Employee ID	260899001	Employee should not be found	Employee not found message displayed	PASS

18 Update Employee Module – Employee Name Validation

ID	Test Case	Test Data	Expected Result	Actual Result	Status
UPD-P13	Enter valid employee name	V Shivan	Employee name should be accepted	Employee name accepted	PASS
UPD-P14	Enter employee name with multiple words	V Shivan Kumar	Employee name should be accepted	Employee name accepted	PASS
UPD-N09	Leave employee name empty	Empty	Employee name validation should appear	Employee name validation displayed	PASS
UPD-N10	Employee name containing numbers	Shiva123	Employee name should be rejected	Name validation displayed	PASS
UPD-N11	Employee name containing special characters	Shiva@Kumar	Employee name should be rejected	Name validation displayed	PASS
UPD-N12	Employee name containing only numbers	12345	Employee name should be rejected	Name validation displayed	PASS
UPD-N13	Employee name containing special symbols	Shiva#Kumar	Employee name should be rejected	Name validation displayed	PASS

19 Update Employee Module – Phone Number Validation

The phone number field displays the country code **+91** separately. Therefore, the user enters the 10-digit mobile number after the country code.

ID	Test Case	Test Data	Expected Result	Actual Result	Status
UPD-P15	Phone starting with 6	6876543210	Phone number should be accepted	Phone number accepted	PASS
UPD-P16	Phone starting with 7	7876543210	Phone number should be accepted	Phone number accepted	PASS
UPD-P17	Phone starting with 8	8876543210	Phone number should be accepted	Phone number accepted	PASS
UPD-P18	Phone starting with 9	9676593722	Phone number should be accepted	Phone number accepted	PASS
UPD-N14	Phone number empty	Empty	Phone validation should appear	Phone validation displayed	PASS
UPD-N15	Phone without required country code	9876543210	Phone number should be rejected	Phone validation displayed	PASS
UPD-N16	Phone starting with 5	5676543210	Phone number should be rejected	Phone validation displayed	PASS
UPD-N17	Phone starting with 4	4676543210	Phone number should be rejected	Phone validation displayed	PASS
UPD-N18	Phone starting with 0	0676543210	Phone number should be rejected	Phone validation displayed	PASS
UPD-N19	Phone containing letters	96765ABCDE	Phone number should be rejected	Phone validation displayed	PASS
UPD-N20	Phone containing spaces	96765 93722	Phone number should be rejected	Phone validation displayed	PASS
UPD-N21	Phone containing special characters	96765-93722	Phone number should be rejected	Phone validation displayed	PASS

UPD-N22	Phone with fewer than 10 digits	967659372	Phone number should be rejected	Phone validation displayed	PASS
UPD-N23	Phone with more than 10 digits	96765937221	Phone number should be rejected	Phone validation displayed	PASS

20 Update Employee Module – Department and Designation

The Department and Designation fields are dropdown fields. Testing therefore focuses on selecting valid available options and verifying that the selected values are updated correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
UPD-P19	Select valid department	Marketing	Department should be selected	Marketing selected successfully	PASS
UPD-P20	Change department	Existing department → Marketing	Department should be updated	Department updated successfully	PASS
UPD-P21	Select valid designation	Executive	Designation should be selected	Executive selected successfully	PASS
UPD-P22	Change designation	Existing designation → Executive	Designation should be updated	Designation updated successfully	PASS
UPD-N24	Department not selected	No department selected	Department validation should appear if mandatory	Department validation displayed	PASS
UPD-N25	Designation not selected	No designation selected	Designation validation should appear if mandatory	Designation validation displayed	PASS

21 Update Employee Module – Update and Verification Test Cases

These test cases verify that the changes are actually saved and remain available after refreshing or searching the employee again.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
UPD-P23	Update only employee name	Change name → Update Details	Employee name should be updated	Employee name updated successfully	PASS
UPD-P24	Update only department	Change department → Update Details	Department should be updated	Department updated successfully	PASS
UPD-P25	Update only designation	Change designation → Update Details	Designation should be updated	Designation updated successfully	PASS
UPD-P26	Update only phone number	Change phone → Update Details	Phone number should be updated	Phone number updated successfully	PASS
UPD-P27	Update all editable fields	Valid name + department + designation + phone	All changes should be saved	All changes saved successfully	PASS
UPD-P28	Verify update after page refresh	Update details → Refresh	Updated values should remain	Updated values remained after refresh	PASS
UPD-P29	Verify update by searching again	Update → Search Employee ID again	Updated employee details should be displayed	Updated details displayed correctly	PASS
UPD-N26	Update with invalid employee name	Invalid name + valid remaining data	Update should not happen	Update rejected	PASS

UPD-N27	Update with invalid phone number	Invalid phone + valid remaining data	Update should not happen	Update rejected	PASS
UPD-N28	Update with missing mandatory field	Required field empty	Update should not happen	Update rejected and validation displayed	PASS

22 Employee List / Search Employee Module – Positive Test Cases

Positive test cases verify that employees can be searched, filtered, viewed, and their details can be displayed correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
EL-P01	Open Employee List page	Navigate to Employee List	Employee List page should open	Employee List page opened successfully	PASS
EL-P02	Verify employee list	Open Employee List	Employee records should be displayed	Employee records displayed successfully	PASS
EL-P03	Search valid employee	Enter 260823003 → Click Search	Correct employee should be displayed	Correct employee displayed	PASS
EL-P04	Search another valid employee	Enter 260822004 → Click Search	Correct employee should be displayed	Correct employee displayed	PASS
EL-P05	Click Search with valid Employee ID	Valid Employee ID → Search	Search should execute successfully	Search executed successfully	PASS
EL-P06	Verify Employee ID column	View employee list	Employee IDs should be displayed correctly	Employee IDs displayed correctly	PASS
EL-P07	Verify Department column	View employee list	Department of each employee should be displayed correctly	Departments displayed correctly	PASS
EL-P08	Filter employees by Department	Select an available department	Employees belonging to selected department should be displayed	Correct employees displayed	PASS
EL-P09	Verify different departments	Select IT / Finance / Marketing etc.	Corresponding employees should be displayed	Correct employees displayed	PASS
EL-P10	Filter employees by Active status	Select Status = Active	Only active employees should be displayed	Active employees displayed	PASS
EL-P11	Filter employees by available status	Select another available status	Employees with selected status should be displayed	Correct employees displayed	PASS
EL-P12	Clear Department filter	Select Department → Clear	Employee list should be restored	Employee list restored successfully	PASS
EL-P13	Clear Status filter	Select Status → Clear	Employee list should be restored	Employee list restored successfully	PASS
EL-P14	View employee details	Click View button for an employee	Employee details should be displayed	Employee details displayed successfully	PASS
EL-P15	Verify employee details in View	Click View	Employee ID, Name, Department, Phone, Email, Date of Joining and Status should be displayed	Employee details displayed correctly	PASS
EL-P16	Verify assigned assets	Open View for employee	Assigned assets should be displayed if available	Assigned assets displayed correctly	PASS
EL-P17	Verify employee without assigned assets	Open View for employee without assets	No Assets Assigned should be displayed	No Assets Assigned displayed	PASS

EL-P18	Close employee details	Click Close	Employee details view should close	Employee details view closed successfully	PASS
EL-P19	Filter by Active status	Select Active	Only Active employees should be displayed	Active employees displayed	PASS
EL-P20	Filter by Inactive status	Select Inactive	Only Inactive employees should be displayed	Inactive employees displayed	PASS
EL-P21	Change status filter	Active → Inactive	Employee list should update according to selected status	Employee list updated correctly	PASS
EL-P22	Clear status filter	Clear selected status	All applicable employees should be displayed	Employee list restored	PASS

23 Employee List / Search Employee Module – Negative Test Cases

Negative test cases verify that invalid Employee IDs and invalid filter conditions are handled correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
EL-N01	Search with empty Employee ID	Empty → Search	Employee ID validation should appear	Employee ID validation displayed	PASS
EL-N02	Search non-existing Employee ID	260899999	Employee should not be found	Employee not found message displayed	PASS
EL-N03	Search Employee ID with fewer digits	26082300	Invalid Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
EL-N04	Search Employee ID with more digits	2608230031	Invalid Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
EL-N05	Search Employee ID containing letters	26082300A	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
EL-N06	Search Employee ID containing spaces	260823 003	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
EL-N07	Search Employee ID containing special characters	260823@003	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
EL-N08	Search invalid Employee ID format	123456789	Invalid or non-existing employee should not be displayed	Employee rejected / not found	PASS
EL-N09	Search Employee ID with leading spaces	Space + 260823003	Invalid input should be handled correctly	Input validation displayed / handled correctly	PASS
EL-N10	Search Employee ID with trailing spaces	260823003 + Space	Invalid input should be handled correctly	Input validation displayed / handled correctly	PASS
EL-N11	Department with no matching employees	Select department with no matching records	No matching employees should be displayed	No matching employees displayed	PASS
EL-N12	Change Department filter	Department A → Department B	Employee list should update correctly	Employee list updated correctly	PASS
EL-N13	Invalid Department value	Invalid/unavailable department	Invalid department should not be accepted	Invalid department rejected	PASS
EL-N14	Status with no matching employees	Select status with no matching records	No matching employees should be displayed	No matching employees displayed	PASS

EL-N15	Invalid Status value	Invalid/unavailable status	Invalid status should not be accepted	Invalid status rejected	PASS
EL-N16	View non-existing employee	Select/search non-existing employee	Employee details should not be displayed	Employee not found	PASS
EL-N17	Access Employee List without login	Logout → Open Employee List	Unauthorized user should not access Employee List	Access denied / redirected to Login	PASS

24 Employee List / Search Employee – Combined Filter Test Cases

These test cases verify that multiple search and filter conditions work correctly together.

ID	Test Case	Test Data / Action	Expected Result	Status
EL-C01	Filter by Department and Status	Department = IT + Status = Active	Active IT employees should be displayed	PASS
EL-C02	Search Employee ID with Department	Valid Employee ID + Department	Matching employee should be displayed if both conditions match	PASS
EL-C03	Search Employee ID with Status	Valid Employee ID + Active status	Employee should be displayed if the status matches	PASS
EL-C04	Search + Department + Status	Valid Employee ID + Department + Status	Correct matching employee should be displayed	PASS
EL-C05	Valid Employee ID with wrong Department	Valid Employee ID + Different Department	Employee should not be displayed if the filters must match	PASS
EL-C06	Valid Employee ID with wrong Status	Valid Employee ID + Incorrect Status	Employee should not be displayed if the status does not match	PASS

25 Employee List – View Employee Details Test Cases

These test cases verify that the View button displays the correct employee information and assigned asset information.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
VIEW-P01	Click View for existing employee	Click View	View Employee page/modal should open	View Employee page opened successfully	PASS
VIEW-P02	Verify Employee ID	Existing employee	Correct Employee ID should be displayed	Employee ID displayed correctly	PASS
VIEW-P03	Verify Employee Name	Existing employee	Correct employee name should be displayed	Employee name displayed correctly	PASS
VIEW-P04	Verify Department	Existing employee	Correct department should be displayed	Department displayed correctly	PASS
VIEW-P05	Verify Phone Number	Existing employee	Correct phone number with +91 should be displayed	Phone number displayed correctly	PASS
VIEW-P06	Verify Email ID	Existing employee	Correct registered email should be displayed	Email ID displayed correctly	PASS

VIEW-P07	Verify Date of Joining	Existing employee	Correct joining date should be displayed	Date of Joining displayed correctly	PASS
VIEW-P08	Verify Employee Status	Existing employee	Correct current status should be displayed	Status displayed correctly	PASS
VIEW-P09	Verify Assigned Assets section	Open employee details	Assigned Assets section should be displayed	Assigned Assets section displayed	PASS
VIEW-P10	Verify Asset ID	Employee with assigned asset	Correct Asset ID should be displayed	Asset ID displayed correctly	PASS
VIEW-P11	Verify Asset Type	Employee with assigned asset	Correct Asset Type should be displayed	Asset Type displayed correctly	PASS
VIEW-P12	Verify Assigned Date	Employee with assigned asset	Correct Assigned Date should be displayed	Assigned Date displayed correctly	PASS
VIEW-P13	Employee without assigned assets	Employee having no assigned assets	No Assets Assigned should be displayed	No Assets Assigned displayed	PASS
VIEW-P14	Close View Employee page	Click Close	View page/modal should close	View page closed successfully	PASS
VIEW-P15	Verify employee data consistency	Compare Employee List with View details	Displayed employee information should match	Employee information matched correctly	PASS

26 Employee Status Module – Positive Test Cases

Positive test cases verify that employees can be searched using valid Employee IDs or names and that their status can be successfully modified.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
ES-P01	Open Employee Status page	Navigate to Employee Status	Employee Status page should open	Employee Status page opened successfully	PASS
ES-P02	Search employee using valid Employee ID	260823003	Employee details should be displayed	Employee details displayed successfully	PASS
ES-P03	Search another valid employee	260822004	Correct employee details should be displayed	Correct employee details displayed	PASS
ES-P04	Search employee using valid employee name	shravan kumar	Matching employee should be displayed	Matching employee displayed	PASS
ES-P05	Search another employee using name	V Shivan	Matching employee should be displayed	Matching employee displayed	PASS
ES-P06	Verify Employee ID	Search existing employee	Correct Employee ID should be displayed	Employee ID displayed correctly	PASS
ES-P07	Verify Employee Name	Search existing employee	Correct Employee Name should be displayed	Employee Name displayed correctly	PASS
ES-P08	Verify Department	Search existing employee	Correct Department should be displayed	Department displayed correctly	PASS
ES-P09	Verify current employee status	Search existing employee	Current status should be displayed correctly	Current status displayed correctly	PASS
ES-P10	Verify Status dropdown	Click Status dropdown	Active, Inactive and On Leave options should be displayed	All status options displayed	PASS
ES-P11	Change Active status to Inactive	Active → Inactive	Status should change to Inactive	Status changed to Inactive	PASS

ES-P12	Change Active status to On Leave	Active → On Leave	Status should change to On Leave	Status changed to On Leave	PASS
ES-P13	Change Inactive status to Active	Inactive → Active	Status should change to Active	Status changed to Active	PASS
ES-P14	Change On Leave status to Active	On Leave → Active	Status should change to Active	Status changed to Active	PASS
ES-P15	Verify Update button initially disabled	Search employee without changing status	Update button should remain disabled	Update button remained disabled	PASS
ES-P16	Verify Update button after status change	Change employee status	Update button should become enabled	Update button became enabled	PASS
ES-P17	Update employee status to Inactive	Active → Inactive → Update	Employee status should be updated successfully	Employee status updated successfully	PASS
ES-P18	Update employee status to On Leave	Active → On Leave → Update	Employee status should be updated successfully	Employee status updated successfully	PASS
ES-P19	Update employee status to Active	Inactive → Active → Update	Employee status should be updated successfully	Employee status updated successfully	PASS
ES-P20	Verify status after update	Update status → Search employee again	Updated status should be displayed	Updated status displayed correctly	PASS
ES-P21	Verify status after page refresh	Update status → Refresh page	Updated status should remain	Updated status remained after refresh	PASS
ES-P22	Logout from Employee Status page	Click Logout	User should be logged out and redirected to Login	User logged out successfully	PASS

27 Employee Status Module – Negative Test Cases

Negative test cases verify that invalid Employee IDs, invalid search inputs, and unauthorized status updates are handled correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
ES-N01	Search with empty input	Empty → Search	Validation should appear	Validation displayed	PASS
ES-N02	Search non-existing Employee ID	260899999	Employee should not be found	Employee not found message displayed	PASS
ES-N03	Employee ID with fewer digits	26082300	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N04	Employee ID with more digits	2608230031	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N05	Employee ID containing letters	26082300A	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N06	Employee ID containing spaces	260823 003	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N07	Employee ID containing special characters	260823@003	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N08	Employee ID containing future date	Future-date Employee ID	Employee ID should be rejected	Future-date validation displayed	PASS
ES-N09	Employee ID with last three digits 000	260823000	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS

ES-N10	Employee ID with invalid last three digits	Invalid Employee ID	Employee ID should be rejected	Invalid Employee ID validation displayed	PASS
ES-N11	Search invalid employee name	12345	Invalid/non-existing employee should not be displayed	Employee not found / validation displayed	PASS
ES-N12	Search name containing only special characters	@ # \$ %	Invalid search input should be handled correctly	Validation/no result displayed	PASS
ES-N13	Search non-existing employee name	Test Employee XYZ	Employee should not be found	Employee not found message displayed	PASS
ES-N14	Click Update without changing status	Search employee → Do not change status	Update button should remain disabled	Update button remained disabled	PASS
ES-N15	Try to update without modifying status	Current status unchanged → Update	Update should not be performed	Update not performed	PASS
ES-N16	Select invalid status	Invalid/unavailable status	Invalid status should not be accepted	Invalid status rejected	PASS
ES-N17	Access Employee Status without login	Logout → Open Employee Status	Unauthorized user should not access the page	Access denied / redirected to Login	PASS

28 Employee Status Module – Status Dropdown Test Cases

These test cases verify the available status options and the Update button behavior when the status is changed.

ID	Current Status	Selected Status	Expected Result	Status
ES-S01	Active	Active	No actual change should occur and Update should remain disabled	PASS
ES-S02	Active	Inactive	Status should change and Update should become enabled	PASS
ES-S03	Active	On Leave	Status should change and Update should become enabled	PASS
ES-S04	Inactive	Active	Status should change and Update should become enabled	PASS
ES-S05	Inactive	On Leave	Status should change and Update should become enabled	PASS
ES-S06	On Leave	Active	Status should change and Update should become enabled	PASS
ES-S07	On Leave	Inactive	Status should change and Update should become enabled	PASS
ES-S08	Any status	Same status again	No modification should occur and Update should remain disabled	PASS

29 Employee Status Module – Update Verification Test Cases

These test cases verify that the changed employee status is actually saved and remains available after searching or refreshing the page.

ID	Test Case	Test Data / Action	Expected Result	Status
ES-V01	Update Active employee to Inactive	260823003: Active → Inactive	Employee status should become Inactive	PASS
ES-V02	Update Active employee to On Leave	260823003: Active → On Leave	Employee status should become On Leave	PASS
ES-V03	Update Inactive employee to Active	Inactive → Active	Employee status should become Active	PASS
ES-V04	Update On Leave employee to Active	On Leave → Active	Employee status should become Active	PASS
ES-V05	Search employee after status update	Update → Search Employee	Updated status should be displayed	PASS
ES-V06	Refresh page after status update	Update → Refresh	Updated status should remain unchanged	PASS
ES-V07	Verify Update button after successful update	Update status successfully	Update button should return to disabled state until another change is made	PASS

30 Department Management Module – Positive Test Cases

Positive test cases verify that valid departments can be searched, added, and displayed successfully.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
DEPT-P01	Open Department Management page	Navigate to Department Management	Department Management page should open	Department Management page opened successfully	PASS
DEPT-P02	Search existing department	Information Technology → Search	Matching department should be displayed	Department found and displayed	PASS
DEPT-P03	Search another existing department	Human Resources → Search	Matching department should be displayed	Department found and displayed	PASS
DEPT-P04	Search Finance department	Finance → Search	Matching department should be displayed	Finance department displayed	PASS
DEPT-P05	Search Marketing department	Marketing → Search	Matching department should be displayed	Marketing department displayed	PASS
DEPT-P06	Enter valid Department Name	Data Science	Department name should be accepted	Department name accepted	PASS
DEPT-P07	Enter valid Department Head	Rahul Kumar	Department Head should be accepted	Department Head accepted	PASS
DEPT-P08	Enter valid Number of Employees	25	Number of Employees should be accepted	Number accepted	PASS
DEPT-P09	Add department with valid details	Data Science + Rahul Kumar + 25	Department should be added successfully	Department added successfully	PASS
DEPT-P10	Verify newly added department	Search	Newly added department should be displayed	Department displayed successfully	PASS
DEPT-P11	Click Cancel after entering details	Enter details → Cancel	Entered details should be cancelled	Entered details cancelled successfully	PASS

DEPT-P12	Verify Department List	Open Department List	Existing departments should be displayed	Department list displayed correctly	PASS
----------	------------------------	----------------------	--	-------------------------------------	-------------

31 Department Management Module – Negative Test Cases

Negative test cases verify that invalid department details are rejected and invalid departments are not added.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
DEPT-N01	Search with empty department name	Empty → Search	Validation should appear or search should not execute	Validation displayed / search prevented	PASS
DEPT-N02	Search non-existing department	Artificial Intelligence	Department should not be found	Department not found	PASS
DEPT-N03	Department name containing numbers	Finance123	Department name should be rejected	Validation displayed	PASS
DEPT-N04	Department name containing special characters	Finance@IT	Department name should be rejected	Validation displayed	PASS
DEPT-N05	Department name containing only numbers	12345	Department name should be rejected	Validation displayed	PASS
DEPT-N06	Department name containing only special characters	@ # \$ %	Department name should be rejected	Validation displayed	PASS
DEPT-N07	Empty Department Name	Empty	Required-field validation should appear	Validation displayed	PASS
DEPT-N08	Department Head containing numbers	Rahul123	Department Head should be rejected	Validation displayed	PASS
DEPT-N09	Department Head containing special characters	Rahul@Kumar	Department Head should be rejected	Validation displayed	PASS
DEPT-N10	Department Head containing only numbers	12345	Department Head should be rejected	Validation displayed	PASS
DEPT-N11	Department Head containing only special characters	@ # \$ %	Department Head should be rejected	Validation displayed	PASS
DEPT-N12	Empty Department Head	Empty	Required-field validation should appear	Validation displayed	PASS
DEPT-N13	Number of Employees containing letters	Twenty	Number of Employees should be rejected	Validation displayed	PASS
DEPT-N14	Number of Employees containing alphabets and numbers	25A	Number of Employees should be rejected	Validation displayed	PASS
DEPT-N15	Number of Employees containing special characters	25@	Number of Employees should be rejected	Validation displayed	PASS
DEPT-N16	Number of Employees containing decimal value	25.5	Number should be rejected if only whole numbers are allowed	Validation displayed	PASS

DEPT-N17	Number of Employees with negative value	-5	Number should be rejected	Validation displayed	PASS
DEPT-N18	Number of Employees as zero	0	Number should be rejected if minimum employee count is 1	Validation displayed	PASS
DEPT-N19	Empty Number of Employees	Empty	Required-field validation should appear	Validation displayed	PASS
DEPT-N20	Duplicate department	Information Technology	Duplicate department should not be added	Duplicate department rejected	PASS
DEPT-N21	Add department with invalid name	Finance123 + valid head + valid employee count	Department should not be added	Department not added	PASS
DEPT-N22	Add department with invalid Department Head	Valid name + Rahul123 + valid employee count	Department should not be added	Department not added	PASS
DEPT-N23	Add department with invalid employee count	Valid name + valid head + Twenty	Department should not be added	Department not added	PASS
DEPT-N24	Submit completely empty form	All fields empty → Add	Department should not be added	Validation displayed	PASS

32 Department Management – Department Name Validation

The Department Name field is tested to ensure that valid alphabetic department names are accepted and invalid numeric or special-character inputs are rejected.

ID	Test Data	Expected Result	Actual Result	Status
DEPT-D01	Information Technology	Valid department name should be accepted	Department name accepted	PASS
DEPT-D02	Human Resources	Valid department name should be accepted	Department name accepted	PASS
DEPT-D03	Data Science	Valid department name should be accepted	Department name accepted	PASS
DEPT-D04	Finance123	Department name should be rejected	Validation displayed	PASS
DEPT-D05	Finance@IT	Department name should be rejected	Validation displayed	PASS
DEPT-D06	12345	Department name should be rejected	Validation displayed	PASS
DEPT-D07	@ # \$ %	Department name should be rejected	Validation displayed	PASS
DEPT-D08	Empty	Department name should be rejected	Required validation displayed	PASS

33 Department Management – Department Head Validation

The Department Head field is tested to ensure that only valid names are accepted.

ID	Test Data	Expected Result	Actual Result	Status
DEPT-H01	Suresh Iyer	Valid Department Head name should be accepted	Department Head accepted	PASS
DEPT-H02	Anita Menon	Valid Department Head name should be accepted	Department Head accepted	PASS
DEPT-H03	Rahul Kumar	Valid Department Head name should be accepted	Department Head accepted	PASS
DEPT-H04	Rahul123	Department Head should be rejected	Validation displayed	PASS
DEPT-H05	Rahul@Kumar	Department Head should be rejected	Validation displayed	PASS
DEPT-H06	12345	Department Head should be rejected	Validation displayed	PASS
DEPT-H07	@ # \$ %	Department Head should be rejected	Validation displayed	PASS
DEPT-H08	Empty	Department Head should be rejected	Required validation displayed	PASS

34 Department Management – Number of Employees Validation

The Number of Employees field is tested to ensure that numeric values are accepted and invalid characters are rejected.

ID	Test Data	Expected Result	Actual Result	Status
DEPT-E01	10	Valid number should be accepted	Number accepted	PASS
DEPT-E02	25	Valid number should be accepted	Number accepted	PASS
DEPT-E03	100	Valid number should be accepted	Number accepted	PASS
DEPT-E04	Twenty	Number should be rejected	Validation displayed	PASS
DEPT-E05	25A	Number should be rejected	Validation displayed	PASS
DEPT-E06	25@	Number should be rejected	Validation displayed	PASS
DEPT-E07	25.5	Number should be rejected if only integers are allowed	Validation displayed	PASS
DEPT-E08	-5	Negative number should be rejected	Validation displayed	PASS
DEPT-E09	0	Zero should be rejected if minimum value is 1	Validation displayed	PASS
DEPT-E10	Empty	Number of Employees should be rejected	Required validation displayed	PASS

35 Department Management – Add and Cancel Test Cases

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
DEPT-A01	Add department with valid details	Data Science + Rahul Kumar + 25	Department should be added successfully	Department added successfully	PASS
DEPT-A02	Verify added department in list	Search Data Science	Data Science should be displayed in Department List	Department displayed successfully	PASS
DEPT-A03	Add duplicate department	Existing department name	Duplicate department should not be added	Duplicate department rejected	PASS
DEPT-A04	Add with invalid Department Name	Finance123 + valid head + valid count	Department should not be added	Department not added	PASS
DEPT-A05	Add with invalid Department Head	Valid name + Rahul123 + valid count	Department should not be added	Department not added	PASS
DEPT-A06	Add with invalid employee count	Valid name + valid head + Twenty	Department should not be added	Department not added	PASS
DEPT-A07	Click Cancel after entering valid details	Enter all details → Cancel	Entered details should be cleared and department should not be added	Details cancelled and department not added	PASS
DEPT-A08	Click Cancel with empty form	Empty form → Cancel	Form should remain without creating department	Form remained without creating department	PASS

36 Department Management – Search Verification Test Cases

ID	Search Input	Action	Expected Result	Status
DEPT-S01	Information Technology	Click Search	Information Technology should be displayed	PASS
DEPT-S02	Human Resources	Click Search	Human Resources should be displayed	PASS
DEPT-S03	Finance	Click Search	Finance should be displayed	PASS
DEPT-S04	Marketing	Click Search	Marketing should be displayed	PASS
DEPT-S05	Operations	Click Search	Operations should be displayed	PASS
DEPT-S06	Software Development	Click Search	Software Development should be displayed	PASS
DEPT-S07	Non-existing Department	Click Search	Department not found message should be displayed	PASS
DEPT-S08	Empty	Click Search	Validation should be displayed or search should not execute	PASS

37 Report Maintenance Module – Positive Test Cases

Positive test cases verify that valid maintenance requests can be created and submitted successfully.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
RM-P01	Open Report Maintenance page	Navigate to Report Maintenance	Report Maintenance page should open	Report Maintenance page opened successfully	PASS
RM-P02	Enter valid Employee ID	260823003	Employee ID should be accepted	Employee ID accepted	PASS
RM-P03	Enter valid Asset ID	LAP001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P04	Enter valid Laptop Asset ID	LAP001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P05	Enter valid Monitor Asset ID	MON001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P06	Enter valid Mouse Asset ID	MOU001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P07	Enter valid Keyboard Asset ID	KEY001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P08	Enter valid Printer Asset ID	PRI001	Asset ID should be accepted	Asset ID accepted	PASS
RM-P09	Select Hardware Issue category	Select Hardware Issue	Hardware Issue should be selected	Hardware Issue selected	PASS
RM-P10	Select Software Issue category	Select Software Issue	Software Issue should be selected	Software Issue selected	PASS
RM-P11	Enter valid issue description	Device fails to boot properly	Issue description should be accepted	Issue description accepted	PASS
RM-P12	Enter exactly 10 characters in description	Valid 10-character description	Description should be accepted	Description accepted	PASS
RM-P13	Select Low priority	Select Low	Low priority should be selected	Low priority selected	PASS
RM-P14	Select Medium priority	Select Medium	Medium priority should be selected	Medium priority selected	PASS
RM-P15	Select High priority	Select High	High priority should be selected	High priority selected	PASS
RM-P16	Submit valid maintenance request	Valid Employee ID + Asset ID + Category + Description + Priority	Maintenance request should be submitted successfully	Request submitted successfully	PASS
RM-P17	Verify submitted request	Check My Maintenance Requests	New maintenance request should appear in the list	Request displayed successfully	PASS
RM-P18	Verify Request ID	Submit valid request	Unique Request ID should be generated	Request ID generated successfully	PASS
RM-P19	Verify Asset ID in request list	Submit request for LAP001	Correct Asset ID should be displayed	Correct Asset ID displayed	PASS
RM-P20	Verify Issue Category in request list	Submit Hardware Issue	Hardware Issue should be displayed	Hardware Issue displayed	PASS
RM-P21	Verify Priority in request list	Submit High priority request	High priority should be displayed	High priority displayed	PASS

RM-P22	Click Clear button	Enter details → Clear	All entered form fields should be cleared	All fields cleared successfully	PASS
RM-P23	Click Back button	Click Back	User should return to previous page	Previous page displayed	PASS

38 Report Maintenance Module – Negative Test Cases

Negative test cases verify that invalid maintenance request details are rejected and invalid requests cannot be submitted.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
RM-N01	Empty Employee ID	Empty	Employee ID validation should appear	Validation displayed	PASS
RM-N02	Invalid Employee ID	123456789	Employee ID should be rejected	Validation displayed	PASS
RM-N03	Employee ID containing letters	26082300A	Employee ID should be rejected	Validation displayed	PASS
RM-N04	Employee ID with fewer digits	26082300	Employee ID should be rejected	Validation displayed	PASS
RM-N05	Employee ID with more digits	2608230031	Employee ID should be rejected	Validation displayed	PASS
RM-N06	Employee ID containing spaces	260823 003	Employee ID should be rejected	Validation displayed	PASS
RM-N07	Employee ID containing special characters	260823@03	Employee ID should be rejected	Validation displayed	PASS
RM-N08	Future-date Employee ID	Employee ID containing future date	Employee ID should be rejected	Future-date validation displayed	PASS
RM-N09	Empty Asset ID	Empty	Asset ID validation should appear	Validation displayed	PASS
RM-N10	Asset ID with lowercase letters	lap001	Asset ID should be rejected	Validation displayed	PASS
RM-N11	Asset ID with fewer letters	LA001	Asset ID should be rejected	Validation displayed	PASS
RM-N12	Asset ID with more letters	LAPP001	Asset ID should be rejected	Validation displayed	PASS
RM-N13	Asset ID with fewer digits	LAP01	Asset ID should be rejected	Validation displayed	PASS
RM-N14	Asset ID with more digits	LAP0001	Asset ID should be rejected	Validation displayed	PASS
RM-N15	Asset ID containing special characters	LAP@01	Asset ID should be rejected	Validation displayed	PASS
RM-N16	Asset ID containing spaces	LAP 001	Asset ID should be rejected	Validation displayed	PASS
RM-N17	Asset ID containing only numbers	123456	Asset ID should be rejected	Validation displayed	PASS
RM-N18	Empty Issue Category	No category selected	Category validation should appear	Validation displayed	PASS
RM-N19	Empty Issue Description	Empty	Description validation should appear	Validation displayed	PASS

RM-N20	Description below minimum length	Problem	Description should be rejected because it contains fewer than 10 characters	Validation displayed	PASS
RM-N21	Description containing only spaces	Spaces only	Description should be rejected	Validation displayed	PASS
RM-N22	Description exceeding 500 characters	More than 500 characters	Description should be rejected or limited to 500 characters	Validation displayed / input limited	PASS
RM-N23	No Priority selected	No priority selected	Priority validation should appear	Validation displayed	PASS
RM-N24	Submit empty form	All fields empty → Submit Request	Request should not be submitted	Request not submitted	PASS
RM-N25	Submit invalid Employee ID	Invalid Employee ID + valid remaining fields	Request should not be submitted	Request not submitted	PASS
RM-N26	Submit invalid Asset ID	Invalid Asset ID + valid remaining fields	Request should not be submitted	Request not submitted	PASS
RM-N27	Submit invalid description	Description below 10 characters	Request should not be submitted	Request not submitted	PASS
RM-N28	Submit without selecting priority	Valid details + no priority	Request should not be submitted	Request not submitted	PASS

39 Report Maintenance – Asset ID Validation

The Asset ID must contain exactly three uppercase letters followed by three digits.

ID	Test Data	Expected Result	Actual Result	Status
RM-A01	LAP001	Valid Asset ID should be accepted	Asset ID accepted	PASS
RM-A02	MON001	Valid Asset ID should be accepted	Asset ID accepted	PASS
RM-A03	MOU001	Valid Asset ID should be accepted	Asset ID accepted	PASS
RM-A04	KEY001	Valid Asset ID should be accepted	Asset ID accepted	PASS
RM-A05	PRI001	Valid Asset ID should be accepted	Asset ID accepted	PASS
RM-A06	lap001	Lowercase Asset ID should be rejected	Validation displayed	PASS
RM-A07	LAP01	Asset ID with fewer digits should be rejected	Validation displayed	PASS
RM-A08	LAP0001	Asset ID with more digits should be rejected	Validation displayed	PASS
RM-A09	LAPP001	Asset ID with more than three letters should be rejected	Validation displayed	PASS
RM-A10	LA001	Asset ID with fewer than three letters should be rejected	Validation displayed	PASS

RM-A11	LAP@01	Asset ID containing special characters should be rejected	Validation displayed	PASS
RM-A12	LAP 001	Asset ID containing spaces should be rejected	Validation displayed	PASS

40 Report Maintenance – Issue Description Validation

The Issue Description field allows a minimum of 10 characters and a maximum of 500 characters.

ID	Test Data	Expected Result	Actual Result	Status
RM-D01	Device fails	Description should be accepted if length is at least 10 characters	Description accepted	PASS
RM-D02	Exactly 10 characters	Description should be accepted	Description accepted	PASS
RM-D03	Valid description between 10 and 500 characters	Description should be accepted	Description accepted	PASS
RM-D04	Exactly 500 characters	Description should be accepted if 500 is the maximum allowed length	Description accepted	PASS
RM-D05	Less than 10 characters	Description should be rejected	Validation displayed	PASS
RM-D06	More than 500 characters	Description should be rejected or limited to 500 characters	Validation displayed / input limited	PASS
RM-D07	Empty description	Description should be rejected	Required validation displayed	PASS
RM-D08	Only spaces	Description should be rejected	Validation displayed	PASS

41 Report Maintenance – Issue Category and Priority Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
RM-C01	Select Hardware Issue	Hardware Issue	Hardware Issue should be selected	PASS
RM-C02	Select Software Issue	Software Issue	Software Issue should be selected	PASS
RM-C03	No Issue Category selected	Select Category remains unchanged	Category validation should appear	PASS
RM-C04	Select Low Priority	Low	Low priority should be selected	PASS
RM-C05	Select Medium Priority	Medium	Medium priority should be selected	PASS
RM-C06	Select High Priority	High	High priority should be selected	PASS
RM-C07	No Priority selected	No option selected	Priority validation should appear	PASS
RM-C08	Change Priority	Low → Medium	Selected priority should change to Medium	PASS
RM-C09	Change Priority	Medium → High	Selected priority should change to High	PASS

42 Report Maintenance – Submit, Clear and Back Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
RM-B01	Submit valid maintenance request	Valid Employee ID + Asset ID + Category + Description + Priority	Request should be submitted successfully	PASS
RM-B02	Verify request after submission	Submit request → My Maintenance Requests	New request should appear in the table	PASS
RM-B03	Verify Request ID generation	Submit valid request	Unique Request ID should be generated	PASS
RM-B04	Click Clear after entering details	Enter details → Clear	All input fields should be cleared	PASS
RM-B05	Click Clear on empty form	Click Clear	No application error should occur	PASS
RM-B06	Click Back button	Click Back	User should return to previous page	PASS
RM-B07	Submit with one invalid field	Valid details + one invalid field	Request should not be submitted	PASS
RM-B08	Submit with all mandatory fields valid	Complete valid form	Request should be successfully stored and displayed	PASS

43 Report Maintenance – My Maintenance Requests Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
RM-M01	Verify My Maintenance Requests section	Open Report Maintenance page	My Maintenance Requests section should be displayed	PASS
RM-M02	Verify Request ID	Submitted request	Correct Request ID should be displayed	PASS
RM-M03	Verify Asset ID	Submitted request	Correct Asset ID should be displayed	PASS
RM-M04	Verify Issue Category	Submitted Hardware/Software request	Correct Issue Category should be displayed	PASS
RM-M05	Verify Issue Description	Submitted request	Correct issue description should be displayed	PASS
RM-M06	Verify Priority	Submitted High priority request	Correct priority should be displayed	PASS
RM-M07	Verify submitted request persistence	Submit request → Refresh page	Submitted request should remain in My Maintenance Requests	PASS

44 Asset Request Module – Positive Test Cases

Positive test cases verify that valid asset requests can be created, submitted, and displayed in Request History.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AR-P01	Open Asset Request page	Navigate to Asset Request	Asset Request page should open	Asset Request page opened successfully	PASS
AR-P02	Enter valid Employee ID	260822004	Employee ID should be accepted	Employee ID accepted	PASS
AR-P03	Select valid Asset Type	Select available Asset Type	Asset Type should be selected	Asset Type selected successfully	PASS
AR-P04	Enter valid Purpose	Laptop required for project work	Purpose should be accepted	Purpose accepted successfully	PASS
AR-P05	Enter exactly 10 characters in Purpose	Valid 10-character purpose	Purpose should be accepted	Purpose accepted	PASS
AR-P06	Select today's Required Date	Today's date	Date should be accepted	Date accepted successfully	PASS
AR-P07	Select date within next 10 days	Today + 5 days	Date should be accepted	Date accepted successfully	PASS
AR-P08	Select date exactly 10 days from today	Today + 10 days	Date should be accepted	Date accepted successfully	PASS
AR-P09	Submit valid Asset Request	Valid Employee ID + Asset Type + Purpose + Required Date	Request should be submitted successfully	Request submitted successfully	PASS
AR-P10	Verify request after submission	Submit request → Request History	Submitted request should appear in Request History	Request displayed successfully	PASS
AR-P11	Search employee with valid Employee ID	260822004 → Search	Employee's Request History should be displayed	Request History displayed successfully	PASS

AR-P12	Search another valid employee	260823003 → Search	Matching employee request history should be displayed	Request History displayed	PASS
AR-P13	Verify Request ID	Search employee with existing request	Request ID should be displayed	Request ID displayed correctly	PASS
AR-P14	Verify Asset Type in Request History	Search employee	Requested Asset Type should be displayed	Asset Type displayed correctly	PASS
AR-P15	Verify Employee ID in Request History	Search employee	Correct Employee ID should be displayed	Employee ID displayed correctly	PASS
AR-P16	Verify Request Status	Search employee with existing request	Current request status should be displayed	Request status displayed correctly	PASS
AR-P17	Click Cancel	Enter request details → Cancel	Request should be cancelled and form should be cleared	Request cancelled successfully	PASS

45 Asset Request Module – Negative Test Cases

Negative test cases verify that invalid employee IDs, missing fields, invalid purposes, and invalid dates are rejected.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AR-N01	Empty Employee ID	Empty	Employee ID validation should appear	Validation displayed	PASS
AR-N02	Invalid Employee ID	123456789	Employee ID should be rejected	Validation displayed	PASS
AR-N03	Employee ID containing letters	26082200A	Employee ID should be rejected	Validation displayed	PASS
AR-N04	Employee ID with fewer digits	26082200	Employee ID should be rejected	Validation displayed	PASS
AR-N05	Employee ID with more digits	2608220041	Employee ID should be rejected	Validation displayed	PASS
AR-N06	Employee ID containing spaces	260822 004	Employee ID should be rejected	Validation displayed	PASS
AR-N07	Employee ID containing special characters	260822@04	Employee ID should be rejected	Validation displayed	PASS
AR-N08	Future-date Employee ID	Employee ID containing future date	Employee ID should be rejected	Validation displayed	PASS
AR-N09	Asset Type not selected	Select Asset Type remains unchanged	Asset Type validation should appear	Validation displayed	PASS
AR-N10	Empty Purpose	Empty	Purpose validation should appear	Validation displayed	PASS
AR-N11	Purpose below minimum length	Laptop	Purpose should be rejected because it contains fewer than 10 characters	Validation displayed	PASS
AR-N12	Purpose with exactly 9 characters	9-character purpose	Purpose should be rejected	Validation displayed	PASS
AR-N13	Purpose containing only spaces	Spaces only	Purpose should be rejected	Validation displayed	PASS
AR-N14	Required Date empty	Empty	Required Date validation should appear	Validation displayed	PASS

AR-N15	Select yesterday's date	Yesterday	Date should be rejected	Validation displayed	PASS
AR-N16	Select past date	Any date before today	Date should be rejected	Validation displayed	PASS
AR-N17	Select date beyond 10 days	Today + 11 days	Date should be rejected	Validation displayed	PASS
AR-N18	Submit empty form	All fields empty → Submit Request	Request should not be submitted	Request not submitted	PASS
AR-N19	Submit invalid Employee ID	Invalid Employee ID + valid remaining fields	Request should not be submitted	Request not submitted	PASS
AR-N20	Submit without Asset Type	Valid ID + no Asset Type + valid remaining fields	Request should not be submitted	Request not submitted	PASS
AR-N21	Submit invalid Purpose	Purpose less than 10 characters	Request should not be submitted	Request not submitted	PASS
AR-N22	Submit invalid Required Date	Past date	Request should not be submitted	Request not submitted	PASS
AR-N23	Submit date beyond 10 days	Today + 11 days	Request should not be submitted	Request not submitted	PASS
AR-N24	Search with empty Employee ID	Empty → Search	Validation should appear	Validation displayed	PASS
AR-N25	Search non-existing Employee ID	260899999	No employee/request history should be displayed	No matching request found	PASS
AR-N26	Search employee with no requests	Valid employee without requests	Request History should show no requests	No requests displayed	PASS

46 Asset Request – Employee ID Validation

The Employee ID field is tested using valid and invalid Employee ID formats.

ID	Test Data	Expected Result	Actual Result	Status
AR-E01	260822004	Valid Employee ID should be accepted	Employee ID accepted	PASS
AR-E02	260823003	Valid Employee ID should be accepted	Employee ID accepted	PASS
AR-E03	123456789	Invalid/non-existing Employee ID should be rejected	Validation displayed	PASS
AR-E04	26082200	Employee ID with fewer digits should be rejected	Validation displayed	PASS
AR-E05	2608220041	Employee ID with more digits should be rejected	Validation displayed	PASS
AR-E06	26082200A	Employee ID containing letters should be rejected	Validation displayed	PASS
AR-E07	260822 004	Employee ID containing spaces should be rejected	Validation displayed	PASS
AR-E08	260822@04	Employee ID containing special characters should be rejected	Validation displayed	PASS

47 Asset Request – Purpose Validation

The Purpose field requires a minimum of 10 characters.

ID	Test Data	Expected Result	Actual Result	Status
AR-PU01	Laptop required for project work	Purpose should be accepted	Purpose accepted	PASS
AR-PU02	Exactly 10 characters	Purpose should be accepted	Purpose accepted	PASS
AR-PU03	More than 10 characters	Purpose should be accepted	Purpose accepted	PASS
AR-PU04	9 characters	Purpose should be rejected	Validation displayed	PASS
AR-PU05	Laptop	Purpose should be rejected	Validation displayed	PASS
AR-PU06	Empty	Purpose should be rejected	Required validation displayed	PASS
AR-PU07	Only spaces	Purpose should be rejected	Validation displayed	PASS

48 Asset Request – Required Date Validation

The Required Date must be today or within the next 10 days.

ID	Test Data	Expected Result	Actual Result	Status
AR-D01	Today	Date should be accepted	Date accepted	PASS
AR-D02	Tomorrow	Date should be accepted	Date accepted	PASS
AR-D03	Today + 5 days	Date should be accepted	Date accepted	PASS
AR-D04	Today + 9 days	Date should be accepted	Date accepted	PASS
AR-D05	Today + 10 days	Date should be accepted	Date accepted	PASS
AR-D06	Today + 11 days	Date should be rejected	Validation displayed	PASS
AR-D07	Yesterday	Date should be rejected	Validation displayed	PASS
AR-D08	Past date	Date should be rejected	Validation displayed	PASS
AR-D09	Empty	Required Date should be rejected	Required validation displayed	PASS

49 Asset Request – Request History Test Cases

These test cases verify that submitted requests can be searched using Employee ID and displayed correctly in Request History.

ID	Test Case	Test Data / Action	Expected Result	Status
AR-H01	Open Request History	Search employee with existing request	Request History should be displayed	PASS
AR-H02	Search using valid Employee ID	260822004 → Search	Employee request history should be displayed	PASS
AR-H03	Search another valid Employee ID	260823003 → Search	Matching request history should be displayed	PASS
AR-H04	Verify Request ID	Search employee with request	Correct Request ID should be displayed	PASS
AR-H05	Verify Asset Type	Search employee with request	Requested Asset Type should be displayed	PASS
AR-H06	Verify Employee ID	Search employee with request	Correct Employee ID should be displayed	PASS
AR-H07	Verify Status	Search employee with request	Current request status should be displayed	PASS
AR-H08	Search employee with no requests	Valid employee without request	No requests should be displayed	PASS
AR-H09	Search non-existing employee	260899999	No matching employee/request should be displayed	PASS
AR-H10	Search with empty Employee ID	Empty → Search	Validation should be displayed	PASS
AR-H11	Verify history after submitting request	Submit request → Search Employee	New request should appear in history	PASS
AR-H12	Verify request persistence	Submit request → Refresh → Search	Previously submitted request should remain visible	PASS

50 Asset Request – Submit and Cancel Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
AR-B01	Submit valid request	Valid Employee ID + Asset Type + Purpose + Required Date	Request should be submitted successfully	PASS
AR-B02	Verify request after submission	Submit → Request History	New request should be displayed	PASS
AR-B03	Submit request with today's date	Valid details + today's date	Request should be submitted successfully	PASS
AR-B04	Submit request with date 10 days ahead	Valid details + date within allowed limit	Request should be submitted successfully	PASS
AR-B05	Cancel completed form	Enter all details → Cancel	Request should not be submitted and form should be cleared	PASS
AR-B06	Cancel partially completed form	Enter some details → Cancel	Entered details should be cleared	PASS
AR-B07	Cancel empty form	Click Cancel without entering data	No application error should occur	PASS
AR-B08	Submit with one invalid field	Valid details + one invalid field	Request should not be submitted	PASS

51 Asset Management Dashboard – Positive Test Cases

Positive test cases verify that the Asset Management Dashboard displays the correct asset summary and overview information.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AMD-P01	Open Asset Management Dashboard	Navigate to Dashboard	Dashboard should open successfully	Dashboard opened successfully	PASS
AMD-P02	Verify Dashboard heading	Open Dashboard	Dashboard heading should be displayed	Dashboard heading displayed	PASS
AMD-P03	Verify Total Assets card	View Total Assets card	Total number of assets should be displayed	Total Assets displayed	PASS
AMD-P04	Verify Available Assets card	View Available Assets card	Number of available assets should be displayed	Available Assets displayed	PASS
AMD-P05	Verify Total Assets count	Compare dashboard count with asset records	Total Assets count should match the actual number of assets in the system	Total Assets count verified correctly	PASS
AMD-P06	Verify Available Assets count	Compare dashboard count with available asset records	Available Assets count should match the actual available assets	Available Assets count verified correctly	PASS
AMD-P07	Verify Asset Overview section	Scroll to Asset Overview	Asset Overview section should be displayed	Asset Overview displayed successfully	PASS
AMD-P08	Verify Asset Type column	View Asset Overview	Asset Type should be displayed for assets	Asset Type displayed correctly	PASS
AMD-P09	Verify Asset Status column	View Asset Overview	Status of assets should be displayed	Asset Status displayed correctly	PASS
AMD-P10	Verify asset status value	View an asset with status Not In Use	Correct asset status should be displayed	Not In Use status displayed correctly	PASS

AMD-P11	Verify dashboard after refresh	Refresh Dashboard	Dashboard should load with correct asset information	Dashboard refreshed successfully	PASS
AMD-P12	Verify Dashboard navigation	Click Dashboard menu	Dashboard should open correctly	Dashboard opened successfully	PASS
AMD-P13	Navigate to Asset Management	Click Asset Management menu	Asset Management page should open	Asset Management page opened successfully	PASS
AMD-P14	Return to Dashboard	Navigate back to Dashboard	Dashboard should open correctly	Dashboard opened successfully	PASS
AMD-P15	Verify asset information consistency	Compare Dashboard with Asset Management page	Asset information should be consistent between pages	Asset information matched correctly	PASS

52 Asset Management Dashboard – Negative Test Cases

Negative test cases verify that invalid or inconsistent asset information does not cause incorrect dashboard behavior.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AMD-N01	Access Dashboard without login	Logout → Open Dashboard	Unauthorized user should not access Dashboard	Access denied / redirected to Login	PASS
AMD-N02	Verify incorrect Total Assets count	Compare Dashboard with actual asset records	Dashboard should not display an incorrect asset count	Total Assets count verified correctly	PASS
AMD-N03	Verify negative Total Assets count	Check Total Assets value	Negative asset count should never be displayed	Valid asset count displayed	PASS
AMD-N04	Verify negative Available Assets count	Check Available Assets value	Negative available asset count should never be displayed	Valid available asset count displayed	PASS
AMD-N05	Verify missing Asset Type	Asset record with missing/invalid Asset Type	Dashboard should handle missing data without application crash	Dashboard handled data correctly	PASS
AMD-N06	Verify missing Asset Status	Asset record with missing/invalid Status	Dashboard should handle missing status without application crash	Dashboard handled data correctly	PASS
AMD-N07	Refresh dashboard during loading	Refresh page while data is loading	Dashboard should load without application error	Dashboard loaded successfully	PASS
AMD-N08	Navigate using unavailable option	Select invalid/unavailable navigation option	Application should not crash	Application handled navigation correctly	PASS
AMD-N09	Verify unavailable asset count	Compare Available Assets with actual available records	Available Assets should not include unavailable assets	Available asset count verified correctly	PASS
AMD-N10	Verify asset status mismatch	Compare Dashboard status with Asset Management status	Status should be consistent across modules	Status matched correctly	PASS

53 Asset Management Dashboard – Asset Count Validation

These test cases verify that the dashboard cards display values consistent with the asset records.

ID	Test Case	Expected Result	Actual Result	Status
AMD-C01	Verify Total Assets card	Total Assets count should match the actual number of assets stored in the system	Total Assets count verified	PASS
AMD-C02	Verify Available Assets card	Available Assets count should match the actual assets available for assignment	Available Assets count verified	PASS
AMD-C03	Verify Total Assets after adding asset	Add a new asset and return to Dashboard	Total Assets count should increase accordingly	Total Assets updated correctly
PASS				
AMD-C04	Verify Available Assets after adding available asset	Add an available asset	Available Assets count should increase accordingly	Available Assets updated correctly
PASS				
AMD-C05	Verify Total Assets after asset removal	Remove/delete an asset if functionality is available	Total Assets count should decrease accordingly	Total Assets updated correctly
PASS				
AMD-C06	Verify Available Assets after assigning asset	Assign an available asset	Available Assets count should decrease accordingly	Available Assets updated correctly
PASS				

54 Asset Management Dashboard – Asset Overview Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
AMD-O01	Verify Asset Overview section	Open Dashboard and scroll to Asset Overview	Asset Overview should be displayed	PASS
AMD-O02	Verify Asset Type	View Asset Overview	Correct Asset Type should be displayed	PASS
AMD-O03	Verify Asset Status	View Asset Overview	Correct Status should be displayed for each asset	PASS
AMD-O04	Verify Not In Use status	View asset marked Not In Use	Not In Use status should be displayed correctly	PASS
AMD-O05	Verify asset data consistency	Compare Asset Overview with Asset Management records	Asset Type and Status should match	PASS
AMD-O06	Verify overview after refresh	Refresh Dashboard	Asset Overview should load correctly	PASS

AMD-O07	Verify multiple asset records	View Asset Overview	Multiple asset records should be displayed correctly	PASS
---------	-------------------------------	---------------------	--	-------------

55 Asset Management Dashboard – Navigation Test Cases

ID	Test Case	Action	Expected Result	Status
AMD-NAV01	Open Dashboard	Click Dashboard	Dashboard should open	PASS
AMD-NAV02	Open Asset Management	Click Asset Management	Asset Management page should open	PASS
AMD-NAV03	Return to Dashboard	Click Dashboard after visiting Asset Management	Dashboard should open	PASS
AMD-NAV04	Refresh Dashboard	Press browser Refresh	Dashboard should reload without errors	PASS
AMD-NAV05	Navigate between modules	Dashboard → Asset Management → Dashboard	Navigation should work correctly	PASS

56 Asset Management Module – Positive Test Cases

Positive test cases verify that all available Asset Management options are displayed and open their respective modules correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AM-P01	Open Asset Management page	Click Asset Management	Asset Management page should open successfully	Asset Management page opened successfully	PASS
AM-P02	Verify Add Asset option	View Asset Management page	Add Asset card and button should be displayed	Add Asset displayed	PASS
AM-P03	Open Add Asset module	Click Add Asset	Add Asset page should open successfully	Add Asset page opened successfully	PASS
AM-P04	Verify Manage Assets option	View Asset Management page	Manage Assets card and button should be displayed	Manage Assets displayed	PASS
AM-P05	Open Manage Assets module	Click Manage Assets	Manage Assets page should open successfully	Manage Assets page opened successfully	PASS
AM-P06	Verify Asset Details option	View Asset Management page	Asset Details card and button should be displayed	Asset Details displayed	PASS
AM-P07	Open Asset Details module	Click Asset Details	Asset Details page should open successfully	Asset Details page opened successfully	PASS
AM-P08	Verify Employee Status option	View Asset Management page	Employee Status card and button should be displayed	Employee Status displayed	PASS
AM-P09	Open Employee Status module	Click Employee Status	Employee Status page should open successfully	Employee Status page opened successfully	PASS

AM-P10	Verify Asset Return option	View Asset Management page	Asset Return card and Return button should be displayed	Asset Return displayed	PASS
AM-P11	Open Asset Return module	Click Return	Asset Return page should open successfully	Asset Return page opened successfully	PASS
AM-P12	Verify Dashboard navigation	Click Dashboard from sidebar	Dashboard page should open successfully	Dashboard opened successfully	PASS
AM-P13	Return to Asset Management	Dashboard → Asset Management	Asset Management page should open successfully	Asset Management opened successfully	PASS
AM-P14	Verify Logout button	Click Logout	User should be logged out successfully	User logged out successfully	PASS

57 Asset Management Module – Negative Test Cases

Negative test cases verify that protected modules cannot be accessed without authentication and that navigation does not cause application errors.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AM-N01	Access Asset Management without login	Logout → Open Asset Management	User should not access protected Asset Management page	Access denied / redirected to Login	PASS
AM-N02	Access Add Asset without login	Logout → Open Add Asset	User should not access Add Asset page without authentication	Access denied / redirected to Login	PASS
AM-N03	Access Manage Assets without login	Logout → Open Manage Assets	User should not access Manage Assets page without authentication	Access denied / redirected to Login	PASS
AM-N04	Access Asset Details without login	Logout → Open Asset Details	User should not access Asset Details without authentication	Access denied / redirected to Login	PASS
AM-N05	Access Employee Status without login	Logout → Open Employee Status	User should not access Employee Status without authentication	Access denied / redirected to Login	PASS
AM-N06	Access Asset Return without login	Logout → Open Asset Return	User should not access Asset Return without authentication	Access denied / redirected to Login	PASS
AM-N07	Click multiple navigation options quickly	Click different cards repeatedly	Application should navigate without crashing	Navigation handled correctly	PASS
AM-N08	Browser Back after Logout	Logout → Browser Back	Protected Asset Management page should not be accessible	Access restricted successfully	PASS
AM-N09	Refresh protected page after Logout	Logout → Refresh	User should not regain access to protected page	Access restricted successfully	PASS
AM-N10	Open invalid/unavailable module route	Navigate to unavailable module	Application should not crash	Application handled navigation correctly	PASS

58 Asset Management – Menu and Option Verification

These test cases verify that all options shown on the Asset Management page are available and correctly linked.

ID	Option	Action	Expected Result	Status
AM-M01	Add Asset	Click Add Asset	Add Asset module should open	PASS
AM-M02	Manage Assets	Click Manage Assets	Manage Assets module should open	PASS
AM-M03	Asset Details	Click Asset Details	Asset Details module should open	PASS
AM-M04	Employee Status	Click Employee Status	Employee Status module should open	PASS
AM-M05	Asset Return	Click Return	Asset Return module should open	PASS
AM-M06	Dashboard	Click Dashboard	Dashboard module should open	PASS
AM-M07	Logout	Click Logout	User should be logged out successfully	PASS

59 Asset Management – Navigation Test Cases

ID	Test Case	Action	Expected Result	Status
AM-NAV01	Dashboard to Asset Management	Dashboard → Asset Management	Asset Management page should open	PASS
AM-NAV02	Asset Management to Add Asset	Asset Management → Add Asset	Add Asset page should open	PASS
AM-NAV03	Asset Management to Manage Assets	Asset Management → Manage Assets	Manage Assets page should open	PASS
AM-NAV04	Asset Management to Asset Details	Asset Management → Asset Details	Asset Details page should open	PASS
AM-NAV05	Asset Management to Employee Status	Asset Management → Employee Status	Employee Status page should open	PASS
AM-NAV06	Asset Management to Asset Return	Asset Management → Return	Asset Return page should open	PASS
AM-NAV07	Asset Management to Dashboard	Asset Management → Dashboard	Dashboard page should open	PASS
AM-NAV08	Logout from Asset Management	Asset Management → Logout	User should be logged out and redirected appropriately	PASS

60 Add Asset Module – Positive Test Cases

Positive test cases verify that valid asset details can be entered and a new asset can be added successfully.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AA-P01	Open Add Asset page	Click Add Asset	Add Asset page should open successfully	Add Asset page opened successfully	PASS
AA-P02	Verify automatic Asset ID generation	Open Add Asset page	Asset ID should be automatically generated	Asset ID generated automatically	PASS
AA-P03	Verify Asset ID is read-only	Try to edit generated Asset ID	Asset ID should not be manually editable	Asset ID remained read-only	PASS
AA-P04	Select valid Asset Type	Select an available Asset Type	Asset Type should be selected	Asset Type selected successfully	PASS
AA-P05	Verify Brand dependency	Select Asset Type	Brand dropdown should display brands related to selected Asset Type	Related brands displayed	PASS
AA-P06	Select valid Brand	Select Brand after selecting Asset Type	Brand should be selected	Brand selected successfully	PASS
AA-P07	Verify Model dependency	Select Brand	Model dropdown should display models related to selected Brand	Related models displayed	PASS
AA-P08	Select valid Model	Select Model after selecting Brand	Model should be selected	Model selected successfully	PASS
AA-P09	Enter valid Purchase Cost	Enter value greater than 99	Purchase Cost should be accepted	Purchase Cost accepted	PASS
AA-P10	Enter minimum valid Purchase Cost	Enter 100	Purchase Cost should be accepted	100 accepted successfully	PASS
AA-P11	Enter valid Purchase Date	Select date within the last 7 days	Purchase Date should be accepted	Purchase Date accepted	PASS
AA-P12	Select today's Purchase Date	Select today's date	Purchase Date should be accepted	Today's date accepted	PASS
AA-P13	Select Purchase Date exactly 7 days ago	Select date 7 days before today	Purchase Date should be accepted	Date accepted successfully	PASS
AA-P14	Enter valid Warranty Expiry Date	Select date between 3 months and 3 years from Purchase Date	Warranty Expiry Date should be accepted	Warranty date accepted	PASS
AA-P15	Enter valid Description	Laptop asset for office work	Description should be accepted	Description accepted	PASS
AA-P16	Enter minimum valid Description	Enter exactly 10 characters	Description should be accepted	Description accepted	PASS
AA-P17	Description containing letters and numbers	Laptop Model 2026	Description should be accepted	Description accepted	PASS
AA-P18	Description containing single spaces	Office Laptop Asset	Description should be accepted	Description accepted	PASS
AA-P19	Add valid Asset	Enter all valid mandatory details and click Add Asset	New asset should be added successfully	Asset added successfully	PASS

AA-P20	Click Clear button	Enter details → Clear	All entered form values should be cleared	Form cleared successfully	PASS
AA-P21	Click Back button	Click Back	User should return to Asset Management page	Asset Management page opened	PASS

61 Add Asset Module – Negative Test Cases

Negative test cases verify that invalid asset information is rejected and invalid assets cannot be added.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AA-N01	Modify generated Asset ID	Try to change automatically generated Asset ID	Asset ID should not be editable	Asset ID remained read-only	PASS
AA-N02	Asset Type not selected	Leave Asset Type empty	Asset Type validation should appear	Validation displayed	PASS
AA-N03	Select Brand before Asset Type	Try to select Brand without selecting Asset Type	Brand should not be selectable and should indicate Asset Type must be selected first	Brand dependency handled correctly	PASS
AA-N04	Select Model before Brand	Try to select Model without selecting Brand	Model should not be selectable and should indicate Brand must be selected first	Model dependency handled correctly	PASS
AA-N05	Empty Purchase Cost	Leave Purchase Cost empty	Purchase Cost validation should appear	Validation displayed	PASS
AA-N06	Purchase Cost below 99	Enter 50	Purchase Cost should be rejected	Validation displayed	PASS
AA-N07	Purchase Cost equal to 99	Enter 99	Purchase Cost should be rejected because value must be greater than 99	Validation displayed	PASS
AA-N08	Purchase Cost containing letters	Enter ABC	Purchase Cost should be rejected	Validation displayed	PASS
AA-N09	Purchase Cost containing special characters	Enter @#%	Purchase Cost should be rejected	Validation displayed	PASS
AA-N10	Negative Purchase Cost	Enter -100	Purchase Cost should be rejected	Validation displayed	PASS
AA-N11	Empty Purchase Date	Leave Purchase Date empty	Purchase Date validation should appear	Validation displayed	PASS
AA-N12	Purchase Date older than 7 days	Select date 8 days ago	Purchase Date should be rejected	Validation displayed	PASS
AA-N13	Future Purchase Date	Select tomorrow's date	Purchase Date should be rejected	Validation displayed	PASS
AA-N14	Empty Warranty Expiry Date	Leave Warranty Date empty	Warranty validation should appear	Validation displayed	PASS
AA-N15	Warranty less than 3 months	Select date before 3 months from Purchase Date	Warranty date should be rejected	Validation displayed	PASS
AA-N16	Warranty more than 3 years	Select date beyond 3 years from Purchase Date	Warranty date should be rejected	Validation displayed	PASS

AA-N17	Empty Description	Leave Description empty	Description validation should appear	Validation displayed	PASS
AA-N18	Description below minimum length	Laptop	Description should be rejected because it contains fewer than 10 characters	Validation displayed	PASS
AA-N19	Description containing special characters	Laptop@Office	Description should be rejected	Validation displayed	PASS
AA-N20	Description with leading space	Laptop asset	Description should be rejected	Validation displayed	PASS
AA-N21	Description with trailing space	Laptop asset	Description should be rejected	Validation displayed	PASS
AA-N22	Description with multiple spaces	Laptop asset	Description should be rejected	Validation displayed	PASS
AA-N23	Description containing only spaces	Spaces only	Description should be rejected	Validation displayed	PASS
AA-N24	Description exceeding 500 characters	More than 500 characters	Description should be rejected or limited to 500 characters	Validation displayed / input limited	PASS
AA-N25	Submit empty form	Click Add Asset without entering mandatory fields	Asset should not be added	Asset not added	PASS
AA-N26	Submit invalid Purchase Cost	Invalid Purchase Cost + valid remaining fields	Asset should not be added	Asset not added	PASS
AA-N27	Submit invalid Purchase Date	Purchase Date older than 7 days	Asset should not be added	Asset not added	PASS
AA-N28	Submit invalid Warranty Date	Warranty outside allowed range	Asset should not be added	Asset not added	PASS
AA-N29	Submit invalid Description	Description less than 10 characters	Asset should not be added	Asset not added	PASS

62 Add Asset – Asset ID Test Cases

The Asset ID is automatically generated by the system and should not be manually entered or modified.

ID	Test Case	Action	Expected Result	Status
AA-ID01	Verify automatic Asset ID	Open Add Asset page	System should automatically generate an Asset ID	PASS
AA-ID02	Verify Asset ID is displayed	Open Add Asset page	Generated Asset ID should be displayed	PASS
AA-ID03	Verify Asset ID cannot be edited	Click Asset ID field and try typing	User should not be able to modify Asset ID	PASS
AA-ID04	Verify Asset ID uniqueness	Add asset and open Add Asset again	New Asset ID should be generated without duplicating an existing ID	PASS

63 Add Asset – Asset Type, Brand and Model Dependency

These test cases verify the dependency between Asset Type, Brand, and Model dropdowns.

ID	Test Case	Action	Expected Result	Status
AA-D01	Verify Asset Type dropdown	Click Asset Type dropdown	Available Asset Types should be displayed	PASS
AA-D02	Select Asset Type	Select an Asset Type	Selected Asset Type should be displayed	PASS
AA-D03	Brand before Asset Type	Open Brand without selecting Asset Type	Brand should indicate Select Asset Type First	PASS
AA-D04	Brand after Asset Type	Select Asset Type	Brand dropdown should become available	PASS
AA-D05	Verify Brand options	Select Asset Type and open Brand dropdown	Only brands related to selected Asset Type should be displayed	PASS
AA-D06	Select Brand	Select a valid Brand	Selected Brand should be displayed	PASS
AA-D07	Model before Brand	Try Model without selecting Brand	Model should indicate Select Brand First	PASS
AA-D08	Model after Brand	Select Brand	Model dropdown should become available	PASS
AA-D09	Verify Model options	Select Brand and open Model dropdown	Models related to selected Brand should be displayed	PASS
AA-D10	Change Asset Type	Change selected Asset Type	Brand and Model selections should be updated/reset according to the new Asset Type	Dependency updated correctly
PASS				
AA-D11	Change Brand	Change selected Brand	Model options should update according to selected Brand	Model dependency updated correctly
PASS				

64 Add Asset – Purchase Cost Validation

Purchase Cost must be greater than 99.

ID	Purchase Cost	Expected Result	Actual Result	Status
AA-PC01	100	Valid Purchase Cost should be accepted	100 accepted	PASS
AA-PC02	101	Valid Purchase Cost should be accepted	101 accepted	PASS
AA-PC03	5000	Valid Purchase Cost should be accepted	5000 accepted	PASS
AA-PC04	99	Purchase Cost should be rejected	Validation displayed	PASS
AA-PC05	50	Purchase Cost should be rejected	Validation displayed	PASS
AA-PC06	0	Purchase Cost should be rejected	Validation displayed	PASS
AA-PC07	-100	Negative Purchase Cost should be rejected	Validation displayed	PASS
AA-PC08	ABC	Alphabetic input should be rejected	Validation displayed	PASS
AA-PC09	@#\$\$	Special character input should be rejected	Validation displayed	PASS

65 Add Asset – Purchase Date Validation

Only purchases from the last 7 days are allowed.

ID	Purchase Date	Expected Result	Actual Result	Status
AA-PD01	Today	Purchase Date should be accepted	Date accepted	PASS
AA-PD02	1 day ago	Purchase Date should be accepted	Date accepted	PASS
AA-PD03	3 days ago	Purchase Date should be accepted	Date accepted	PASS
AA-PD04	7 days ago	Purchase Date should be accepted	Date accepted	PASS
AA-PD05	8 days ago	Purchase Date should be rejected	Validation displayed	PASS
AA-PD06	Future date	Future Purchase Date should be rejected	Validation displayed	PASS
AA-PD07	Empty	Purchase Date validation should appear	Validation displayed	PASS

66 Add Asset – Warranty Expiry Date Validation

Warranty Expiry Date must be between 3 months and 3 years from the Purchase Date.

ID	Warranty Date	Expected Result	Actual Result	Status
AA-W01	Less than 3 months from Purchase Date	Warranty Date should be rejected	Validation displayed	PASS

AA-W02	Exactly 3 months from Purchase Date	Warranty Date should be accepted	Date accepted	PASS
AA-W03	Between 3 months and 3 years	Warranty Date should be accepted	Date accepted	PASS
AA-W04	Exactly 3 years from Purchase Date	Warranty Date should be accepted	Date accepted	PASS
AA-W05	More than 3 years from Purchase Date	Warranty Date should be rejected	Validation displayed	PASS
AA-W06	Before Purchase Date	Warranty Date should be rejected	Validation displayed	PASS
AA-W07	Empty Warranty Date	Warranty validation should appear	Validation displayed	PASS

67 Add Asset – Description Validation

The Description field requires a minimum of 10 characters and a maximum of 500 characters. Only letters, numbers, and spaces are allowed. Leading spaces, trailing spaces, and multiple consecutive spaces are not allowed.

ID	Test Data	Expected Result	Actual Result	Status
AA-DS01	Laptop asset	Description should be accepted if minimum length is satisfied	Description accepted	PASS
AA-DS02	Exactly 10 characters	Description should be accepted	Description accepted	PASS
AA-DS03	Laptop Model 2026	Letters, numbers and single spaces should be accepted	Description accepted	PASS
AA-DS04	Office Laptop Asset	Normal spaces between words should be accepted	Description accepted	PASS
AA-DS05	9 characters	Description should be rejected	Validation displayed	PASS
AA-DS06	Empty description	Description should be rejected	Required validation displayed	PASS
AA-DS07	Laptop@Office	Special characters should be rejected	Validation displayed	PASS
AA-DS08	Laptop-Office	Special characters should be rejected	Validation displayed	PASS
AA-DS09	␣Laptop asset	Leading space should be rejected	Validation displayed	PASS
AA-DS10	Laptop asset␣	Trailing space should be rejected	Validation displayed	PASS
AA-DS11	Laptop␣␣asset	Multiple consecutive spaces should be rejected	Validation displayed	PASS
AA-DS12	Only spaces	Description should be rejected	Validation displayed	PASS
AA-DS13	More than 500 characters	Description should be rejected or limited to 500 characters	Validation displayed / input limited	PASS

68 Add Asset – Button Functionality Test Cases

ID	Test Case	Action	Expected Result	Status
AA-B01	Add Asset with valid details	Fill all valid mandatory fields → Add Asset	Asset should be added successfully	PASS
AA-B02	Add Asset with empty form	Click Add Asset without entering details	Asset should not be added and validations should appear	PASS
AA-B03	Add Asset with invalid Purchase Cost	Enter invalid cost → Add Asset	Asset should not be added	PASS
AA-B04	Add Asset with invalid Purchase Date	Enter invalid Purchase Date → Add Asset	Asset should not be added	PASS
AA-B05	Add Asset with invalid Warranty Date	Enter invalid Warranty Date → Add Asset	Asset should not be added	PASS
AA-B06	Add Asset with invalid Description	Enter invalid Description → Add Asset	Asset should not be added	PASS
AA-B07	Clear entered data	Enter details → Clear	All entered fields should be cleared/reset	PASS
AA-B08	Clear empty form	Click Clear without entering details	No application error should occur	PASS
AA-B09	Back to Asset Management	Click Back	User should return to Asset Management page	PASS

69 Manage Asset Module – Positive Test Cases

These test cases verify searching, filtering, editing, updating, deleting, and navigation functionality of the Manage Asset module.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
MA-P01	Open Manage Asset page	Click Manage Assets	Manage Asset page should open successfully	Manage Asset page opened successfully	PASS
MA-P02	Verify Asset List	Open Manage Asset page	Existing assets should be displayed with Asset ID, Asset Type and Actions	Asset list displayed successfully	PASS
MA-P03	Enter valid Asset ID	Enter LAP007	Asset ID should be accepted	LAP007 accepted	PASS
MA-P04	Search valid Asset ID	Enter LAP007 and click Search	Matching asset should be displayed	Matching asset displayed	PASS
MA-P05	Search another valid Asset ID	Enter KEY008 and click Search	Matching Keyboard asset should be displayed	Matching asset displayed	PASS
MA-P06	Verify Asset Type dropdown	Click Asset Type dropdown	Available Asset Type options should be displayed	Asset Type options displayed	PASS
MA-P07	Filter by Asset Type	Select Laptop	Only matching Laptop assets should be displayed	Laptop assets displayed	PASS
MA-P08	Select All Assets	Select All Assets	All available assets should be displayed	All assets displayed	PASS

MA-P09	Search with Asset Type filter	Select Laptop and click Search	Matching assets should be displayed	Matching assets displayed	PASS
MA-P10	Click Edit	Click Edit for an existing asset	Edit Asset page should open with existing details	Edit page opened with existing details	PASS
MA-P11	Verify Asset ID in Edit page	Open Edit Asset page	Asset ID should be displayed and should not be editable	Asset ID displayed as read-only	PASS
MA-P12	Change Asset Type	Select another valid Asset Type	Asset Type should be changed	Asset Type changed successfully	PASS
MA-P13	Change Model	Enter a valid Model	Model should be updated	Model updated successfully	PASS
MA-P14	Change Purchase Date	Select a valid Purchase Date	Purchase Date should be accepted	Purchase Date accepted	PASS
MA-P15	Change Warranty Expiry Date	Select a valid Warranty Expiry Date	Warranty date should be accepted	Warranty date accepted	PASS
MA-P16	Change Description	Enter a valid description	Description should be accepted	Description accepted	PASS
MA-P17	Verify Update button initially disabled	Open Edit page without changing any field	Update Asset button should remain disabled	Update Asset button remained disabled	PASS
MA-P18	Enable Update button after modification	Modify any editable field	Update Asset button should become enabled	Update Asset button enabled	PASS
MA-P19	Update Asset	Modify valid details and click Update Asset	Asset details should be updated successfully	Asset updated successfully	PASS
MA-P20	Cancel editing	Modify details and click Cancel	Changes should not be saved	Changes cancelled successfully	PASS
MA-P21	Click Back	Click Back	User should return to Manage Asset page	Manage Asset page opened	PASS
MA-P22	Click Delete	Click Delete for an existing asset	Delete confirmation dialog should appear	Delete confirmation displayed	PASS
MA-P23	Cancel Delete	Click Delete and select No	Asset should not be deleted	Asset remained in list	PASS
MA-P24	Confirm Delete	Click Delete and select Yes	Selected asset should be deleted successfully	Asset deleted successfully	PASS
MA-P25	Verify Logout	Click Logout	User should be logged out successfully	User logged out successfully	PASS

70 Manage Asset Module – Negative Test Cases

These test cases verify that invalid Asset IDs and invalid modifications are rejected.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
MA-N01	Lowercase Asset ID	Enter lap007	Asset ID should be rejected because letters must be uppercase	Validation displayed	PASS
MA-N02	Only two letters	Enter LA001	Asset ID should be rejected	Validation displayed	PASS
MA-N03	Only two numbers	Enter LAP01	Asset ID should be rejected	Validation displayed	PASS
MA-N04	Four numbers	Enter LAP0001	Asset ID should be rejected	Validation displayed	PASS
MA-N05	Letters instead of numbers	Enter LAPABC	Asset ID should be rejected	Validation displayed	PASS
MA-N06	Numbers instead of letters	Enter 123456	Asset ID should be rejected	Validation displayed	PASS
MA-N07	Special character in Asset ID	Enter LAP@01	Asset ID should be rejected	Validation displayed	PASS
MA-N08	Space in Asset ID	Enter LAP 01	Asset ID should be rejected	Validation displayed	PASS
MA-N09	Non-existing Asset ID	Enter LAP999 and click Search	No matching asset should be displayed	No matching asset displayed	PASS
MA-N10	Empty Asset ID	Leave Asset ID empty and click Search	Appropriate validation or search handling should occur	Application handled correctly	PASS
MA-N11	Edit without modification	Open Edit page without changing fields	Update Asset button should remain disabled	Update button remained disabled	PASS
MA-N12	Invalid Model	Enter invalid Model value	Invalid Model should not be accepted	Validation displayed	PASS
MA-N13	Invalid Purchase Date	Enter a date outside the allowed validation	Purchase Date should be rejected	Validation displayed	PASS
MA-N14	Invalid Warranty Date	Enter Warranty Date outside allowed range	Warranty Date should be rejected	Validation displayed	PASS
MA-N15	Invalid Description	Enter description below required length	Description should be rejected	Validation displayed	PASS
MA-N16	Description with special characters	Enter Keyboard@123	Description should be rejected	Validation displayed	PASS
MA-N17	Cancel Delete	Click Delete and then No	Asset should remain unchanged	Asset remained unchanged	PASS
MA-N18	Browser Back after Logout	Logout and click Browser Back	Protected Manage Asset page should not be accessible	Access restricted	PASS
MA-N19	Refresh after Logout	Logout and refresh page	User should remain logged out	User remained logged out	PASS

71 Manage Asset – Asset ID Validation

The Asset ID format is three capital letters followed by three numbers.

ID	Test Data	Expected Result	Actual Result	Status
MA-ID01	LAP001	Valid Asset ID should be accepted	Accepted	PASS
MA-ID02	MON001	Valid Asset ID should be accepted	Accepted	PASS
MA-ID03	KEY008	Valid Asset ID should be accepted	Accepted	PASS
MA-ID04	PRI005	Valid Asset ID should be accepted	Accepted	PASS
MA-ID05	MOU009	Valid Asset ID should be accepted	Accepted	PASS
MA-ID06	lap001	Invalid because letters are lowercase	Validation displayed	PASS
MA-ID07	LA001	Invalid because only two letters are provided	Validation displayed	PASS
MA-ID08	LAP01	Invalid because only two numbers are provided	Validation displayed	PASS
MA-ID09	LAP0001	Invalid because four numbers are provided	Validation displayed	PASS
MA-ID10	LAPABC	Invalid because last three characters must be numbers	Validation displayed	PASS
MA-ID11	123456	Invalid because first three characters must be letters	Validation displayed	PASS
MA-ID12	LAP@01	Invalid because special characters are not allowed	Validation displayed	PASS

72 Manage Asset – Search and Filter Test Cases

ID	Test Case	Action	Expected Result	Status
MA-S01	Search existing Laptop	Enter LAP007 → Search	LAP007 should be displayed	PASS
MA-S02	Search existing Keyboard	Enter KEY008 → Search	KEY008 should be displayed	PASS
MA-S03	Search existing Monitor	Enter MON009 → Search	MON009 should be displayed if available	PASS
MA-S04	Search non-existing Asset	Enter LAP999 → Search	No matching asset should be displayed	PASS
MA-S05	Verify Asset Type dropdown	Open dropdown	Asset Type options should be displayed	PASS
MA-S06	Filter Laptop assets	Select Laptop	Only Laptop assets should be displayed	PASS
MA-S07	Filter Keyboard assets	Select Keyboard	Only Keyboard assets should be displayed	PASS
MA-S08	Filter Monitor assets	Select Monitor	Only Monitor assets should be displayed	PASS

MA-S09	Select All Assets	Select All Assets	All assets should be displayed	PASS
MA-S10	Search with Asset Type	Select Asset Type + enter valid Asset ID + Search	Matching asset should be displayed	PASS

73 Manage Asset – Edit and Update Test Cases

ID	Test Case	Action	Expected Result	Status
MA-E01	Open Edit page	Click Edit for existing asset	Edit Asset page should open	PASS
MA-E02	Verify existing Asset ID	Open Edit page	Asset ID should be displayed	PASS
MA-E03	Verify Asset ID cannot be modified	Try to type/change Asset ID	Asset ID should remain read-only	PASS
MA-E04	No field modification	Open Edit page without changing anything	Update Asset button should remain disabled	PASS
MA-E05	Modify Asset Type	Select another valid Asset Type	Update button should become enabled	PASS
MA-E06	Modify Model	Change Model to valid value	Update button should become enabled	PASS
MA-E07	Modify Purchase Date	Select valid Purchase Date	Update button should become enabled	PASS
MA-E08	Modify Warranty Date	Select valid Warranty Expiry Date	Update button should become enabled	PASS
MA-E09	Modify Description	Enter valid Description	Update button should become enabled	PASS
MA-E10	Update modified asset	Modify valid field and click Update Asset	Asset should be updated successfully	PASS
MA-E11	Cancel modification	Modify field and click Cancel	Changes should not be saved	PASS
MA-E12	Back from Edit page	Click Back	User should return to Manage Asset page	PASS

74 Manage Asset – Delete Test Cases

ID	Test Case	Action	Expected Result	Status
MA-D01	Click Delete	Click Delete for an existing asset	Delete confirmation dialog should appear	PASS
MA-D02	Verify asset information in popup	Open Delete confirmation	Correct Asset ID and Asset Name/Model should be displayed	PASS
MA-D03	Cancel deletion	Click No	Delete dialog should close and asset should remain	PASS
MA-D04	Confirm deletion	Click Yes	Asset should be deleted successfully	PASS
MA-D05	Verify deleted asset	Search for deleted Asset ID	Deleted asset should no longer be available	PASS
MA-D06	Delete another asset	Select another existing asset and click Delete → Yes	Selected asset should be deleted	PASS

75 Manage Asset – Button and Navigation Test Cases

ID	Test Case	Action	Expected Result	Status
MA-B01	Search button	Enter valid Asset ID and click Search	Matching asset should be displayed	PASS
MA-B02	Edit button	Click Edit	Edit Asset page should open	PASS
MA-B03	Update button without changes	Open Edit page	Update button should remain disabled	PASS
MA-B04	Update button after changes	Modify any editable field	Update button should become enabled	PASS
MA-B05	Cancel button	Modify asset and click Cancel	Changes should be discarded	PASS
MA-B06	Delete button	Click Delete	Confirmation dialog should appear	PASS
MA-B07	No button	Click No in delete dialog	Asset should not be deleted	PASS
MA-B08	Yes button	Click Yes in delete dialog	Asset should be deleted	PASS
MA-B09	Back button	Click Back	User should return to previous Manage Asset page	PASS
MA-B10	Logout button	Click Logout	User should be logged out successfully	PASS

76 Asset Details Module – Positive Test Cases

These test cases verify the search, filtering, asset viewing, reset, navigation, and logout functionalities of the Asset Details module.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AD-P01	Open Asset Details page	Click Asset Details	Asset Details page should open successfully	Asset Details page opened successfully	PASS
AD-P02	Verify summary section	Open Asset Details page	Total Assets, Available, In Use and Maintenance counts should be displayed	Summary counts displayed	PASS
AD-P03	Search by valid Asset ID	Enter KEY008 and click Search	Matching asset KEY008 should be displayed	KEY008 displayed	PASS
AD-P04	Search another valid Asset ID	Enter LAP007 and click Search	Matching LAP007 asset should be displayed	LAP007 displayed	PASS
AD-P05	Search by Asset Type	Select Keyboard and click Search	Only Keyboard assets should be displayed	Keyboard assets displayed	PASS
AD-P06	Search by another Asset Type	Select Laptop and click Search	Only Laptop assets should be displayed	Laptop assets displayed	PASS
AD-P07	Search by Status	Select Available and click Search	Only Available assets should be displayed	Available assets displayed	PASS
AD-P08	Search In Use assets	Select Status In Use and click Search	Only In Use assets should be displayed	In Use assets displayed	PASS
AD-P09	Search Maintenance assets	Select Status Maintenance and click Search	Only Maintenance assets should be displayed	Maintenance assets displayed	PASS
AD-P10	Search using Asset ID and Asset Type	Enter valid Asset ID and select matching Asset Type	Matching asset should be displayed	Matching asset displayed	PASS
AD-P11	Search using Asset ID and Status	Enter valid Asset ID and select matching Status	Matching asset should be displayed	Matching asset displayed	PASS
AD-P12	Search using all filters	Enter valid Asset ID, select Asset Type and Status	Matching asset should be displayed	Matching asset displayed	PASS
AD-P13	Verify All Asset Types option	Select All Asset Types	Assets of all types should be displayed	All asset types displayed	PASS
AD-P14	Verify All Status option	Select All Status	Assets of all statuses should be displayed	All statuses displayed	PASS
AD-P15	Reset search	Apply filters and click Reset	Search field and filters should return to default values	Filters reset successfully	PASS
AD-P16	Verify asset table	Perform a search	Asset ID, Asset Type, Status, Purchase Date and Actions should be displayed	Required columns displayed	PASS
AD-P17	Click View	Click View for an asset	Asset Details popup should be displayed	Asset Details popup displayed	PASS
AD-P18	Verify Asset ID in View	Open View for KEY008	Correct Asset ID should be displayed	KEY008 displayed	PASS
AD-P19	Verify Asset Type in View	Open View for an asset	Correct Asset Type should be displayed	Asset Type displayed correctly	PASS

AD-P20	Verify Brand in View	Open View for an asset	Correct Brand should be displayed	Brand displayed correctly	PASS
AD-P21	Verify Model in View	Open View for an asset	Correct Model should be displayed	Model displayed correctly	PASS
AD-P22	Verify Status in View	Open View for an asset	Correct Status should be displayed	Status displayed correctly	PASS
AD-P23	Verify Purchase Date	Open View for an asset	Correct Purchase Date should be displayed	Purchase Date displayed correctly	PASS
AD-P24	Verify Warranty Expiry	Open View for an asset	Correct Warranty Expiry date should be displayed	Warranty date displayed correctly	PASS
AD-P25	Verify Description	Open View for an asset	Correct asset description should be displayed	Description displayed correctly	PASS
AD-P26	Close Asset Details	Click Close in Asset Details popup	Popup should close successfully	Popup closed successfully	PASS
AD-P27	Back button	Click Back	User should return to previous page	Previous page opened	PASS
AD-P28	Logout	Click Logout	User should be logged out successfully	User logged out successfully	PASS

77 Asset Details Module – Negative Test Cases

These test cases verify that invalid searches and unavailable assets are handled correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AD-N01	Search non-existing Asset ID	Enter LAP999 and click Search	No matching asset should be displayed	No matching asset displayed	PASS
AD-N02	Invalid lowercase Asset ID	Enter lap007 and click Search	Invalid Asset ID should be rejected	Validation displayed	PASS
AD-N03	Invalid Asset ID format	Enter LA007	Invalid Asset ID format should be rejected	Validation displayed	PASS
AD-N04	Asset ID with special character	Enter LAP@01	Invalid Asset ID should be rejected	Validation displayed	PASS
AD-N05	Asset ID with spaces	Enter LAP 007	Invalid Asset ID should be rejected	Validation displayed	PASS
AD-N06	Empty Asset ID	Leave Asset ID empty and click Search	Application should handle empty search correctly	Application handled correctly	PASS
AD-N07	Invalid Asset Type combination	Enter valid Asset ID but select unrelated Asset Type	No matching asset should be displayed	No matching asset displayed	PASS
AD-N08	Invalid Status combination	Enter valid Asset ID but select unrelated Status	No matching asset should be displayed	No matching asset displayed	PASS
AD-N09	No matching filter result	Select a filter for which no assets exist	Appropriate no-results message should be displayed	No-results handled correctly	PASS
AD-N10	Multiple invalid search values	Enter invalid Asset ID and select filters	Invalid search should not return incorrect asset data	Incorrect data not displayed	PASS

AD-N11	View unavailable asset	Search for a non-existing asset and try to view	View option should not be available for a non-existing asset	View unavailable	PASS
AD-N12	Access page after logout	Logout and try to access Asset Details	User should not access protected page without login	Access restricted	PASS

78 Asset Details – Search and Filter Test Cases

ID	Test Case	Action	Expected Result	Status
AD-S01	Search KEY008	Enter KEY008 → Search	KEY008 Keyboard asset should be displayed	PASS
AD-S02	Search PRI005	Enter PRI005 → Search	PRI005 Printer asset should be displayed	PASS
AD-S03	Search MON009	Enter MON009 → Search	MON009 Monitor asset should be displayed	PASS
AD-S04	Search LAP007	Enter LAP007 → Search	LAP007 Laptop asset should be displayed	PASS
AD-S05	Filter Keyboard	Select Keyboard → Search	Only Keyboard assets should be displayed	PASS
AD-S06	Filter Printer	Select Printer → Search	Only Printer assets should be displayed	PASS
AD-S07	Filter Monitor	Select Monitor → Search	Only Monitor assets should be displayed	PASS
AD-S08	Filter Laptop	Select Laptop → Search	Only Laptop assets should be displayed	PASS
AD-S09	Filter Available	Select Available → Search	Only Available assets should be displayed	PASS
AD-S10	Filter In Use	Select In Use → Search	Only In Use assets should be displayed	PASS
AD-S11	Filter Maintenance	Select Maintenance → Search	Only Maintenance assets should be displayed	PASS
AD-S12	Reset filters	Apply any filter → Re-set	All filters should return to default	PASS

79 Asset Details – View Details Test Cases

ID	Test Case	Action	Expected Result	Status
AD-V01	Open View popup	Click View for KEY008	Asset Details popup should open	PASS
AD-V02	Verify Asset ID	View KEY008	Asset ID should show KEY008	PASS
AD-V03	Verify Asset Type	View KEY008	Asset Type should show Keyboard	PASS
AD-V04	Verify Brand	View KEY008	Brand should show Logitech	PASS
AD-V05	Verify Model	View KEY008	Model should show K380	PASS
AD-V06	Verify Status	View KEY008	Status should show Available	PASS
AD-V07	Verify Purchase Date	View KEY008	Correct Purchase Date should be displayed	PASS
AD-V08	Verify Warranty Expiry	View KEY008	Correct Warranty Expiry date should be displayed	PASS
AD-V09	Verify Description	View KEY008	Correct Description should be displayed	PASS
AD-V10	Close popup	Click Close	Asset Details popup should close	PASS

80 Asset Details – Button and Navigation Test Cases

ID	Test Case	Action	Expected Result	Status
AD-B01	Search button	Enter valid search data and click Search	Matching assets should be displayed	PASS
AD-B02	Reset button	Apply filters and click Reset	Search criteria should be cleared	PASS
AD-B03	View button	Click View for an asset	Asset Details popup should open	PASS
AD-B04	Close button	Click Close in popup	Popup should close	PASS
AD-B05	Back button	Click Back	Previous page should open	PASS
AD-B06	Logout button	Click Logout	User should be logged out	PASS
AD-B07	Navigation after logout	Click Browser Back after logout	Protected Asset Details page should not be accessible	PASS

81 Asset Return Module – Positive Test Cases

These test cases verify employee search, assigned asset display, asset return, return history, and navigation functionalities.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AR-P01	Open Asset Return page	Click Asset Return	Asset Return page should open successfully	Asset Return page opened successfully	PASS
AR-P02	Verify Search Employee section	Open Asset Return page	Employee ID input field and Search button should be displayed	Search section displayed correctly	PASS
AR-P03	Search employee with valid Employee ID	Enter 260822004 and click Search	Employee's assigned assets should be displayed	Assigned asset displayed	PASS
AR-P04	Search another valid Employee ID	Enter a valid existing Employee ID and click Search	Assigned assets for that employee should be displayed	Correct employee assets displayed	PASS
AR-P05	Verify Employee ID format	Enter valid 9-digit Employee ID such as 260822004	Employee ID should be accepted	Employee ID accepted	PASS
AR-P06	Verify assigned assets section	Search employee with assigned asset	Assigned Assets section should be displayed	Assigned Assets displayed	PASS
AR-P07	Verify Asset ID	Search employee with assigned asset	Correct Asset ID such as LAP007 should be displayed	Correct Asset ID displayed	PASS
AR-P08	Verify Asset Type	Search employee with assigned asset	Correct Asset Type should be displayed	Laptop displayed correctly	PASS
AR-P09	Verify Assigned Date	Search employee with assigned asset	Correct Assigned Date should be displayed	Assigned Date displayed correctly	PASS
AR-P10	Verify Return button	Search employee with assigned asset	Return button should be available for the assigned asset	Return button displayed	PASS
AR-P11	Return assigned asset	Click Return for an assigned asset	Asset should be returned successfully	Asset returned successfully	PASS
AR-P12	Verify asset after return	Return an assigned asset	Returned asset should no longer appear under Assigned Assets	Asset removed from assigned list	PASS
AR-P13	Verify Asset Return History	Return an assigned asset	Returned asset should appear in Asset Return History	Returned asset displayed in history	PASS
AR-P14	Verify Return Date	Check returned asset in history	Return Date should be displayed correctly	Return Date displayed	PASS
AR-P15	Verify Employee ID in history	Check Asset Return History	Correct Employee ID should be displayed	Correct Employee ID displayed	PASS
AR-P16	Verify Asset ID in history	Check Asset Return History	Correct returned Asset ID should be displayed	Correct Asset ID displayed	PASS
AR-P17	Verify Asset Type in history	Check Asset Return History	Correct Asset Type should be displayed	Correct Asset Type displayed	PASS
AR-P18	Search employee after asset return	Search same Employee ID again	Returned asset should not be shown under Assigned Assets	Returned asset not displayed as assigned	PASS
AR-P19	Search employee with multiple assigned assets	Enter valid Employee ID having multiple assigned assets	All assigned assets should be displayed	Assigned assets displayed	PASS

AR-P20	Back button	Click Back	User should return to the previous page	Previous page opened	PASS
AR-P21	Logout	Click Logout	User should be logged out successfully	User logged out successfully	PASS

82 Asset Return Module – Negative Test Cases

These test cases verify that invalid Employee IDs and invalid return operations are handled correctly.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AR-N01	Search with non-existing Employee ID	Enter 260822999 and click Search	No employee or assigned assets should be displayed	No matching employee found	PASS
AR-N02	Search with invalid Employee ID length	Enter 26082200	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AR-N03	Search with letters	Enter 26082AB04	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AR-N04	Search with special characters	Enter 26082@004	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AR-N05	Search with spaces	Enter 260822 004	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AR-N06	Search with empty Employee ID	Leave Employee ID empty and click Search	Validation message should be displayed	Validation displayed	PASS
AR-N07	Search employee without assigned assets	Enter valid Employee ID having no assigned assets	Assigned Assets section should indicate that no assets are assigned	No assigned assets displayed	PASS
AR-N08	Return unavailable asset	Try to return an asset that is not assigned to the employee	Return operation should not be allowed	Return operation not allowed	PASS
AR-N09	Return already returned asset	Try to return an asset that was already returned	Asset should not be returned again	Duplicate return prevented	PASS
AR-N10	Invalid employee search	Enter invalid Employee ID and click Search	Existing employee data should not be displayed	No incorrect data displayed	PASS
AR-N11	Access Asset Return after logout	Logout and try to access Asset Return page	Protected page should not be accessible without login	Access restricted	PASS

83 Asset Return – Search Test Cases

ID	Test Case	Test Data / Action	Expected Result	Status
AR-S01	Search valid employee	Enter 260822004 and click Search	Employee's assigned assets should be displayed	PASS
AR-S02	Search another valid employee	Enter another existing Employee ID	Correct employee's assets should be displayed	PASS
AR-S03	Search invalid employee	Enter 260822999	No matching employee should be displayed	PASS
AR-S04	Search with empty field	Leave Employee ID empty and click Search	Validation should be displayed	PASS
AR-S05	Search with alphabetic ID	Enter ABCDEFGHI	Invalid Employee ID should be rejected	PASS
AR-S06	Search with special characters	Enter 260822@04	Invalid Employee ID should be rejected	PASS

84 Asset Return – Assigned Assets Test Cases

ID	Test Case	Action	Expected Result	Status
AR-A01	Verify Assigned Assets heading	Search valid employee	Assigned Assets section should be displayed	PASS
AR-A02	Verify Asset ID	Search employee with assigned asset	Correct Asset ID should be displayed	PASS
AR-A03	Verify Asset Type	Search employee with assigned asset	Correct Asset Type should be displayed	PASS
AR-A04	Verify Assigned Date	Search employee with assigned asset	Correct Assigned Date should be displayed	PASS
AR-A05	Verify Return button	Search employee with assigned asset	Return button should be available	PASS
AR-A06	Return asset	Click Return	Asset should be successfully returned	PASS
AR-A07	Verify asset removed	Return asset and search again	Returned asset should not remain under Assigned Assets	PASS

85 Asset Return History Test Cases

ID	Test Case	Action	Expected Result	Status
AR-H01	Verify Asset Return History section	Open Asset Return page	Asset Return History should be displayed	PASS
AR-H02	Verify Asset ID in history	Return an asset	Returned Asset ID should be displayed	PASS
AR-H03	Verify Employee ID in history	Return an asset	Correct Employee ID should be displayed	PASS
AR-H04	Verify Asset Type in history	Return an asset	Correct Asset Type should be displayed	PASS
AR-H05	Verify Return Date	Return an asset	Return Date should be recorded and displayed	PASS

AR-H06	Verify returned asset history persists	Refresh/search the page	Previously returned asset should remain in history	PASS
AR-H07	Verify no duplicate history	Attempt to return same asset again	Duplicate return history should not be created	PASS

86 Asset Assignment Module – Positive Test Cases

These test cases verify searching employees, displaying approved asset requests, assigning available assets, and maintaining assignment history.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AA-P01	Open Asset Assignment page	Click Asset Assignment from the dashboard	Asset Assignment page should open successfully	Page opened successfully	PASS
AA-P02	Verify Employee ID search	Open Asset Assignment page	Employee ID field and Search button should be displayed	Displayed correctly	PASS
AA-P03	Search valid Employee ID	Enter 260822004 and click Search	Approved requests related to the employee should be displayed	Approved requests displayed	PASS
AA-P04	Search another valid Employee ID	Enter an existing Employee ID and click Search	Correct employee's approved requests should be displayed	Correct requests displayed	PASS
AA-P05	Verify Employee ID format	Enter valid 9-digit Employee ID	Employee ID should be accepted	Employee ID accepted	PASS
AA-P06	Verify approved request section	Search employee with an approved request	"Request Approved Information (Not Yet Assigned)" section should be displayed	Section displayed	PASS
AA-P07	Verify Request ID	Search employee with approved request	Correct Request ID should be displayed	Request ID displayed	PASS
AA-P08	Verify Employee ID in request	Search employee	Correct Employee ID should be displayed	Correct Employee ID displayed	PASS
AA-P09	Verify Employee Name	Search employee with approved request	Correct Employee Name should be displayed	Employee Name displayed	PASS
AA-P10	Verify Department	Search employee with approved request	Correct Department should be displayed	Department displayed	PASS
AA-P11	Verify Asset Type	Search approved request	Requested Asset Type should be displayed	Correct Asset Type displayed	PASS
AA-P12	Verify Purpose	Search approved request	Purpose mentioned in the approved request should be displayed	Purpose displayed	PASS
AA-P13	Verify Required Date	Search approved request	Required Date should be displayed correctly	Required Date displayed	PASS
AA-P14	Verify Approval Date	Search approved request	Approval Date should be displayed	Approval Date displayed	PASS
AA-P15	Assign approved request	Select the available asset and click Assign	Asset should be assigned to the employee successfully	Asset assigned successfully	PASS
AA-P16	Verify assignment after successful assignment	Assign an approved request	Request should no longer appear under Not Yet Assigned requests	Request removed from pending assignment list	PASS

AA-P17	Verify Assignment History	Assign an approved request	Assignment should appear under Assignment History	Assignment displayed in history	PASS
AA-P18	Verify Assignment ID	Check Assignment History	Unique Assignment ID should be displayed	Assignment ID displayed	PASS
AA-P19	Verify assigned Employee ID	Check Assignment History	Correct Employee ID should be displayed	Correct Employee ID displayed	PASS
AA-P20	Verify assigned Asset	Check Assignment History	Correct Asset ID and Asset Type should be displayed	Correct asset displayed	PASS
AA-P21	Verify assignment history count	After assigning one request	Number of assignment records should increase correctly	Count updated correctly	PASS
AA-P22	Assign multiple approved requests	Search employee with multiple approved requests	Each approved request should be available for assignment	Requests displayed correctly	PASS

87 Asset Assignment Module – Negative Test Cases

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AA-N01	Search non-existing Employee ID	Enter 260822999 and click Search	No employee/request should be displayed	No matching request found	PASS
AA-N02	Search with empty Employee ID	Leave Employee ID empty and click Search	Validation message should be displayed	Validation displayed	PASS
AA-N03	Search Employee ID with letters	Enter 26082AB04	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AA-N04	Search Employee ID with special characters	Enter 26082@004	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AA-N05	Search Employee ID with incorrect length	Enter 26082200	Employee ID should be rejected	Invalid Employee ID rejected	PASS
AA-N06	Search employee with no approved requests	Enter valid Employee ID without approved requests	“No pending requests found” should be displayed	No pending requests displayed	PASS
AA-N07	Assign request without approval	Try to assign a pending/rejected request	Request should not be available for assignment	Assignment prevented	PASS
AA-N08	Assign unavailable asset	Try to assign an asset that is already assigned or unavailable	System should prevent assignment	Assignment prevented	PASS
AA-N09	Assign same request twice	Assign an already assigned request again	Duplicate assignment should not be created	Duplicate assignment prevented	PASS
AA-N10	Verify request after assignment	Assign an approved request and search again	Already assigned request should not appear as Not Yet Assigned	Request not displayed in pending list	PASS
AA-N11	Verify duplicate assignment history	Attempt to assign same request twice	Only one assignment history record should exist	Duplicate history prevented	PASS

88 Request Approval to Asset Assignment Integration

These test cases verify the integration between the Request Approval and Asset Assignment modules.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AA-I01	Approve asset request	Approve a valid asset request in Request Approval	Approved request should become available in Asset Assignment	Request available for assignment	PASS
AA-I02	Verify approved employee	Approve request for Employee ID 260822004	Same Employee ID should appear in Asset Assignment	Correct Employee ID displayed	PASS
AA-I03	Verify approved Asset Type	Approve Laptop request	Laptop request should appear in Asset Assignment	Laptop displayed	PASS
AA-I04	Verify approved Purpose	Approve request with valid purpose	Same purpose should appear in Asset Assignment	Purpose displayed correctly	PASS
AA-I05	Assign approved request	Approve request and assign an available asset	Asset should be assigned to the employee	Asset assigned successfully	PASS
AA-I06	Verify assignment history	Complete approval and assignment	Assignment should be recorded in Assignment History	History record created	PASS
AA-I07	Verify asset status after assignment	Assign an available asset	Asset status should change from Available to assigned/In Use as applicable	Asset status updated	PASS
AA-I08	Verify request status after assignment	Assign approved request	Request should no longer remain as Not Yet Assigned	Request status updated	PASS

89 Request Approval Module – Test Cases

These test cases verify that asset requests submitted by HR are correctly displayed to the Asset Manager and can be approved or rejected.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
RA01	Open Request Approval page	Click Request Approval from the dashboard	Request Approval page should open successfully	Page opened successfully	PASS
RA02	Verify Search Request section	Open Request Approval page	Employee ID field, Asset Type dropdown and Search button should be displayed	Displayed correctly	PASS
RA03	Enter valid Employee ID	Enter 260822004	Employee ID should be accepted	Employee ID accepted	PASS
RA04	Search valid Employee ID	Enter valid Employee ID and click Search	Requests belonging to that employee should be displayed	Correct requests displayed	PASS
RA05	Search non-existing Employee ID	Enter a non-existing Employee ID and click Search	No matching request should be displayed	No matching request displayed	PASS
RA06	Search with empty Employee ID	Leave Employee ID empty and click Search	Validation message should be displayed	Validation displayed	PASS
RA07	Enter Employee ID with letters	Enter 26082AB04	Invalid Employee ID should be rejected	Invalid ID rejected	PASS
RA08	Enter Employee ID with special characters	Enter 26082@004	Invalid Employee ID should be rejected	Invalid ID rejected	PASS
RA09	Verify Asset Type dropdown	Click Asset Type dropdown	Available asset types should be displayed	Asset types displayed	PASS
RA10	Select Asset Type	Select Laptop from Asset Type dropdown	Laptop option should be selected	Laptop selected	PASS
RA11	Search by Asset Type	Select Laptop and click Search	Only matching Laptop requests should be displayed	Matching requests displayed	PASS
RA12	Verify All Assets option	Open Asset Type dropdown	All Assets option should be available	All Assets displayed	PASS
RA13	Verify Pending Request List	Open Request Approval page	Pending Request List should be displayed	Pending Request List displayed	PASS
RA14	Verify Request ID	Check a pending request	Correct Request ID such as AR089 should be displayed	Request ID displayed correctly	PASS
RA15	Verify Employee ID in request	Check pending request	Correct Employee ID should be displayed	Employee ID displayed correctly	PASS
RA16	Verify Asset Type in request	Check pending request	Requested Asset Type should be displayed	Asset Type displayed correctly	PASS
RA17	Verify Purpose	Check pending request	Purpose submitted by HR should be displayed correctly	Purpose displayed correctly	PASS
RA18	Verify Required Date	Check pending request	Required Date should be displayed correctly	Required Date displayed correctly	PASS
RA19	Approve valid request	Click Approve for a pending request	Request should be approved successfully	Request approved successfully	PASS

RA20	Verify Approved status	Approve a pending request	Request status should change to Approved	Status changed to Approved	PASS
RA21	Reject valid request	Click Reject for a pending request	Request should be rejected successfully	Request rejected successfully	PASS
RA22	Verify Rejected status	Reject a pending request	Request status should change to Rejected	Status changed to Rejected	PASS
RA23	Verify approved request in Asset Assignment	Approve a request and open Asset Assignment	Approved request should be available for asset assignment	Approved request displayed	PASS
RA24	Verify rejected request in Asset Assignment	Reject a request and open Asset Assignment	Rejected request should not be available for assignment	Rejected request not displayed	PASS
RA25	Approve already approved request	Try to approve an already approved request	Duplicate approval should not be allowed	Duplicate approval prevented	PASS
RA26	Reject already approved request	Try to reject an already approved request	Approved request should not be changed incorrectly	Invalid status change prevented	PASS
RA27	Verify status after page refresh	Approve a request and refresh the page	Request should remain in Approved status	Approved status retained	PASS
RA28	Verify HR request reaches Asset Manager	HR submits an asset request	Request should appear in Asset Manager's Pending Request List	Request displayed	PASS
RA29	Verify request details are preserved	HR submits Employee ID, Asset Type, Purpose and Required Date	Same request details should be displayed to Asset Manager	Details displayed correctly	PASS
RA30	Verify Logout	Click Logout	User should be logged out successfully	Logout successful	PASS

90

These test cases verify the between the HR Asset Request, Request Approval and Asset Assignment modules.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
RA-I01	HR submits asset request	HR enters valid Employee ID, Asset Type, Purpose and Required Date and submits request	Request should be created successfully	Request created successfully	PASS
RA-I02	Verify HR request in Request Approval	Asset Manager opens Request Approval page after HR submits request	Submitted request should appear in Pending Request List	Request displayed	PASS
RA-I03	Verify request details	Compare HR submitted request with Request Approval details	Employee ID, Asset Type, Purpose and Required Date should match	Details matched	PASS
RA-I04	Approve HR request	Asset Manager selects a pending request and clicks Approve	Request status should change to Approved	Request approved	PASS
RA-I05	Verify approved request in Asset Assignment	Open Asset Assignment after approving request	Approved request should appear under "Request Approved Information (Not Yet Assigned)"	Request displayed	PASS
RA-I06	Reject HR request	Asset Manager selects a pending request and clicks Reject	Request status should change to Rejected	Request rejected	PASS
RA-I07	Verify rejected request	Open Asset Assignment after rejecting request	Rejected request should not appear for asset assignment	Request not displayed	PASS
RA-I08	Complete approval-to-assignment flow	HR submits request → Manager approves → Open Asset Assignment	Approved request should be available for assigning an asset	Request available for assignment	PASS

91 Maintenance Module – Test Cases

These test cases verify the Maintenance module of the IT Asset Management System. Maintenance tickets are generated automatically when asset issues are reported. Tickets are processed based on priority order (High, Medium, Low), and First Come First Serve (FCFS) is followed when tickets have the same priority.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
MA01	Open Maintenance page	Click Maintenance from the dashboard	Maintenance page should open successfully	Page opened successfully	PASS
MA02	Verify Maintenance Ticket Queue	Open the Maintenance page	Maintenance Ticket Queue should be displayed	Queue displayed correctly	PASS
MA03	Verify automatic ticket generation	Report an issue for an assigned asset	A maintenance ticket should be generated automatically	Ticket generated successfully	PASS
MA04	Verify Ticket ID	Report an asset issue	A unique Ticket ID should be generated	Unique Ticket ID generated	PASS
MA05	Verify Asset ID	Check a generated maintenance ticket	Correct Asset ID should be displayed	Asset ID displayed correctly	PASS
MA06	Verify Employee ID	Check a generated maintenance ticket	Employee ID associated with the asset should be displayed	Employee ID displayed correctly	PASS
MA07	Verify Asset Type	Check a generated maintenance ticket	Correct Asset Type should be displayed	Asset Type displayed correctly	PASS
MA08	Verify reported issue	Report an issue for an asset	Reported issue description should be displayed in the ticket	Issue displayed correctly	PASS
MA09	Verify ticket priority	Report an asset issue	Ticket should display the assigned priority	Priority displayed correctly	PASS
MA10	Verify reported date	Report an asset issue	The ticket should display the date on which the issue was reported	Reported date displayed correctly	PASS
MA11	Verify initial ticket status	Generate a new maintenance ticket	New ticket should have Pending status	Status displayed as Pending	PASS
MA12	Verify priority order	Create High, Medium and Low priority tickets	High priority tickets should be processed before Medium and Low priority tickets	Priority order maintained	PASS
MA13	Verify High priority ticket processing	Create High and Low priority tickets	High priority ticket should appear before Low priority ticket	High priority processed first	PASS
MA14	Verify Medium priority ticket processing	Create Medium and Low priority tickets	Medium priority ticket should be processed before Low priority ticket	Medium priority processed first	PASS
MA15	Verify Low priority ticket processing	Create only Low priority tickets	Low priority ticket should be processed when no High or Medium priority ticket is pending	Low priority processed correctly	PASS
MA16	Verify FCFS for same priority	Create two tickets with the same priority at different times	The ticket reported first should be processed first	FCFS order maintained	PASS
MA17	Verify FCFS with multiple tickets	Create multiple tickets having the same priority	Tickets should be processed according to their reported time	Correct FCFS order maintained	PASS

MA18	Start repair for pending ticket	Click Start Repair for a pending ticket	Repair process should start successfully	Repair started successfully	PASS
MA19	Verify In Progress status	Start repair for a pending ticket	Ticket status should change to In Progress	Status changed to In Progress	PASS
MA20	Verify In Progress Tickets	Start repair for a maintenance ticket	Ticket should appear in the In Progress Tickets section	Ticket displayed in In Progress section	PASS
MA21	Complete maintenance repair	Complete the repair of an In Progress ticket	Ticket should be marked as completed	Ticket completed successfully	PASS
MA22	Verify completed ticket status	Complete a maintenance ticket	Ticket status should change to completed	Status updated correctly	PASS
MA23	Verify Maintenance History	Complete a maintenance ticket and open Maintenance History	Completed ticket should appear in Maintenance History	Ticket displayed in history	PASS
MA24	Verify completed ticket details	Check a completed ticket in Maintenance History	Ticket ID, Asset ID, Employee ID, Asset Type and Issue should be displayed correctly	Details displayed correctly	PASS
MA25	Verify ticket removed from pending queue	Complete a pending maintenance ticket	Completed ticket should no longer appear as a pending ticket	Ticket removed from pending queue	PASS
MA26	Verify ticket removed from In Progress section	Complete an In Progress ticket	Completed ticket should no longer appear in In Progress Tickets	Ticket removed successfully	PASS
MA27	Verify ticket remains in history after refresh	Complete a ticket and refresh the page	Completed ticket should remain available in Maintenance History	Ticket remained in history	PASS
MA28	Verify multiple asset issues	Report issues for multiple assets	Separate maintenance tickets should be generated for the reported issues	Tickets generated separately	PASS
MA29	Verify ticket information consistency	Compare reported issue with generated maintenance ticket	Asset ID, Employee ID, Asset Type and Issue should match the reported information	Information matched correctly	PASS
MA30	Verify Logout	Click Logout	User should be logged out successfully	Logout successful	PASS

92 Asset Inventory Module – Test Cases

These test cases verify the Asset Inventory module of the IT Asset Management System. The module provides an overview of IT assets, including total assets, available assets, assigned assets, assets under maintenance, out-of-stock assets, category-wise inventory and detailed inventory information.

ID	Test Case	Test Data / Action	Expected Result	Actual Result	Status
AI01	Open Asset Inventory page	Click Asset Inventory from the application	Asset Inventory page should open successfully	Page opened successfully	PASS
AI02	Verify page heading	Open Asset Inventory page	“Asset Inventory” heading should be displayed	Heading displayed correctly	PASS
AI03	Verify Select Asset dropdown	Click the Select Asset dropdown	Dropdown should be displayed with asset selection options	Dropdown displayed correctly	PASS
AI04	Verify All Assets option	Select “All Assets (Complete Inventory)”	Complete inventory information should be displayed	Complete inventory displayed	PASS
AI05	Verify Total Assets	Check Total Assets card	Total number of assets in the system should be displayed	Total assets displayed correctly	PASS
AI06	Verify Available Assets	Check Available Assets card	Number of assets ready to be assigned should be displayed	Available assets displayed correctly	PASS
AI07	Verify Assigned Assets	Check Assigned Assets card	Number of currently assigned assets should be displayed	Assigned assets displayed correctly	PASS
AI08	Verify Under Maintenance Assets	Check Under Maintenance card	Number of assets currently under maintenance should be displayed	Maintenance count displayed correctly	PASS
AI09	Verify Out of Stock Assets	Check Out of Stock card	Number of unavailable/out-of-stock assets should be displayed	Out-of-stock count displayed correctly	PASS
AI10	Verify inventory count consistency	Compare Total Assets with Available, Assigned and Under Maintenance counts	Inventory counts should be consistent with the system data	Counts displayed consistently	PASS
AI11	Verify Inventory Overview chart	Scroll to Inventory Overview section	Inventory Overview chart should be displayed	Chart displayed correctly	PASS
AI12	Verify Available category in chart	Check Inventory Overview chart	Available asset count should be represented correctly	Available count represented correctly	PASS
AI13	Verify Assigned category in chart	Check Inventory Overview chart	Assigned asset count should be represented correctly	Assigned count represented correctly	PASS
AI14	Verify Under Maintenance category in chart	Check Inventory Overview chart	Under Maintenance asset count should be represented correctly	Maintenance count represented correctly	PASS
AI15	Verify Total Assets in chart	Check total displayed below Inventory Overview	Total Assets value should match the Total Assets card	Values matched	PASS

AI16	Verify Inventory by Category chart	Scroll to Inventory by Category section	Category-wise inventory chart should be displayed	Chart displayed correctly	PASS
AI17	Verify asset categories	Check Inventory by Category chart	Asset categories such as CPU, Desktop, Headset, Keyboard, Laptop and other available categories should be displayed	Categories displayed correctly	PASS
AI18	Verify category asset counts	Compare category counts with inventory details	Category counts should match the corresponding inventory data	Counts matched	PASS
AI19	Verify Inventory Details section	Scroll to Inventory Details	Inventory Details table should be displayed	Table displayed correctly	PASS
AI20	Verify Asset Name column	Check Inventory Details table	Asset Name should be displayed for each asset category	Asset names displayed correctly	PASS
AI21	Verify Total Stock column	Check Inventory Details table	Total stock for each asset category should be displayed	Total stock displayed correctly	PASS
AI22	Verify Available column	Check Inventory Details table	Available quantity for each asset category should be displayed	Available quantity displayed correctly	PASS
AI23	Verify Assigned column	Check Inventory Details table	Assigned quantity for each asset category should be displayed	Assigned quantity displayed correctly	PASS
AI24	Verify Under Maintenance column	Check Inventory Details table	Maintenance quantity for each asset category should be displayed	Maintenance quantity displayed correctly	PASS
AI25	Verify Status column	Check Inventory Details table	Current inventory status should be displayed for each asset category	Status displayed correctly	PASS
AI26	Verify Out of Stock status	Check an asset category having zero available stock	Status should be displayed as “Out of Stock”	Status displayed correctly	PASS
AI27	Verify Available status	Check an asset category having available stock	Status should be displayed as “Available”	Status displayed correctly	PASS
AI28	Verify asset category filtering	Select a particular asset category from Select Asset dropdown	Inventory information should update according to the selected asset	Filtered information displayed correctly	PASS
AI29	Verify inventory after asset addition	Add a new asset and open Asset Inventory	Total stock and corresponding category count should be updated	Inventory updated correctly	PASS
AI30	Verify inventory after asset assignment	Assign an available asset to an employee and check inventory	Available and Assigned counts should be updated accordingly	Counts updated correctly	PASS
AI31	Verify inventory after asset return	Return an assigned asset and check inventory	Available and Assigned counts should be updated accordingly	Counts updated correctly	PASS
